

# ABB drive services

## Engineering Customization

### Tailored solutions for your application needs

Engineering Customization service delivers specific design solutions for your drives and automation applications. Scalable options range from engineering design studies to full turnkey delivery. Engineering Customization provides you with a broad array of options for retrofits, upgrades or modernizing of existing equipment.

### Your benefits

#### Critical plant management

Ensure your business critical plant operations remain available.

#### Risks reduced

Proactive equipment management to eliminate the risks of aging and obsolete equipment.

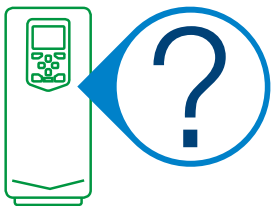

#### Optimized design

The solution is tailored for your specific application and business requirements.

#### World-class drive application expertise

ABB's global engineering capability ensures the best design for your solution.

#### Suitable for

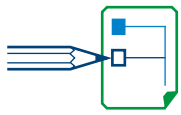

- ABB drives and controls systems in various industrial sectors and applications
- Non-ABB drives and controls systems (case-by-case qualification)

#### Need help?

Contact ABB or third party channel company.

# ABB Engineering Customization service delivery

## You need a tailored drive solution matching your needs

You are looking to upgrade or modernize your drive system, but none of standard solutions exactly meet your needs.

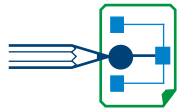

## Contact ABB

Your local ABB Service team will consult ABB global application engineering centers to review your specific needs and propose a tailored solution.

## Analysis of your system's specific needs

ABB drives and controls system application experts will take your application and business objectives into account to ensure a solution that meets both the technical requirements and the goals of the business.

## Solution tailoring

All solutions will also be compliant with local legislation and current safety requirements.

## Manufacturing drawings and documentation

All relevant drawings and documentation will be provided aligned to the appropriate choice of solution delivery.

## Solution implementation

You decide whether you want a design, build and delivery option, or a full turnkey solution including installation and commissioning.

For more information, please contact your local ABB representative or visit:
