Support network

A SupportLine telephone technical support subscription provides fast access to ABB experienced technical support resources, with call priority. In fact, up to 80% of all user inquiries received in our customer service center are resolved during the initial contact with a support engineer.

During emergency or non-emergency situations, SupportLine processes include state-of-the-art call management, fax support, and e-mail response to quickly route requests to appropriate resources, 24 hours a day.

Each support case is carefully tracked by the assigned support specialist to ensure expedient and complete resolution. If escalation becomes necessary, our support structure includes 24-hour access to ABB global product and development resources.

Up-to-date information

Technical support engineers are up-to-date on the latest product information and have access to extensive technical information for ABB products and systems. This includes a library of system and process knowledge and documentation. An archive of support case resolutions is also available to assist
