## **ABB Ability™ SafetyAPP**

A user-friendly tool to improve safety and productivity

### Report

Turn any smart device into the ultimate safety device: with a few screen taps, log any safety hazard, take a picture and categorize it.

### Solve

SafetyAPP immediately notifies supervisors, allowing prompt interventions.

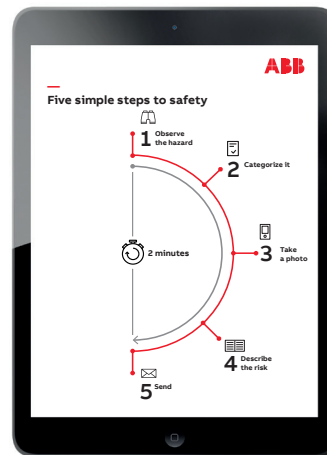

### Analyze

The SafetyAPP is a flexible solution that allows an extraordinary customization and gives instant access to up-to-date materials as well as effective safety statistics and analysis.

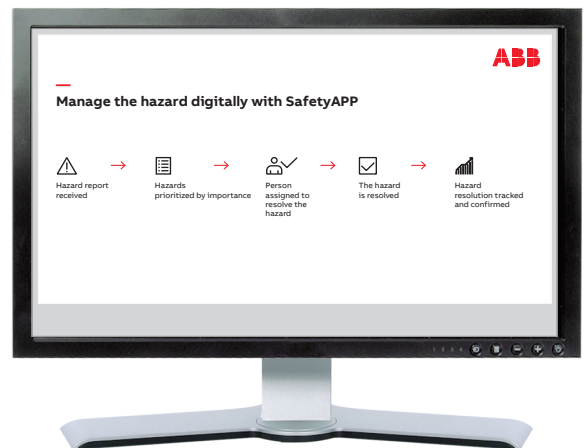

### Improve

SafetyAPP reduces the time spent by employees to manually report hazards and simplifies management efforts, connecting employers and workers.

- Easy to use
- Encourages employee involvement
- Time saving reporting
- Promotes a best-in-class safety culture

## The Value

**The easy to use SafetyAPP demonstrates the commitment of your company to safety without creating the burden of reporting for employees.**

With increased visibility to safety hazards, management can make decisions to prevent potential hazards, while promoting safety awareness within the organization - ultimately protecting your most valuable asset: people.
