# ABB at Power Gen Africa 2015

## Power generation on the world's fastest growing continent

Power and productivity  
for a better world™

# ABB at Power Gen Africa 2015

## Exhibit booth H7

ABB ([www.abb.com](http://www.abb.com)) is a leader in power and automation technologies that enable utility, industry, transport and infrastructure customers to improve their performance while lowering environmental impact.

ABB Power Generation is a world class provider of integrated power and automation solutions for conventional and renewable based power generation plants and water applications. Our offering includes turnkey electrical, automation, instrumentation and control systems supported by a comprehensive service portfolio that optimizes performance, reliability, and efficiency while minimizing environmental impact.

ABB is showcasing an extensive range of leading edge technologies at this year's POWER-GEN Africa conference and exhibition in Cape Town. The three-day event comprises a busy exhibition floor backed by high-level conferences, featuring strategic and technical presentations in the power generation, transmission and distribution sectors.

Among the many products and solutions on display are examples of ABB's industry-leading integrated instrumentation, control and electrical systems with a comprehensive power and automation portfolio for the power and water industries. In addition to a full scope of supply capabilities, plant electrical systems integration features and key differentiators, ABB will present its technology and solutions for plant electrification, thermal and renewable automation, solar, microgrids and service.

In addition, POWER-GEN Africa 2015 will feature the launch of the Symphony Plus SD Series - the latest addition to the S+ Control and I/O family. Our green automation solution can reduce energy consumption, lower hardware requirements and withstand extreme operational conditions.

ABB is also uniquely positioned in microgrids thanks to its innovative technologies, comprehensive product portfolio and proven track record in providing solutions for all types of grids from large to micro.

This event is an opportunity to discuss business requirements and exchange first hand information about African power market trends. ABB will host a number of executive level meetings at our booth, and we would like to exchange ideas with you on a one-on-one basis. To schedule your meeting contact **Samantha Spano** via email at [samantha.spano@us.abb.com](mailto:samantha.spano@us.abb.com) or call + 39 010 6073390.

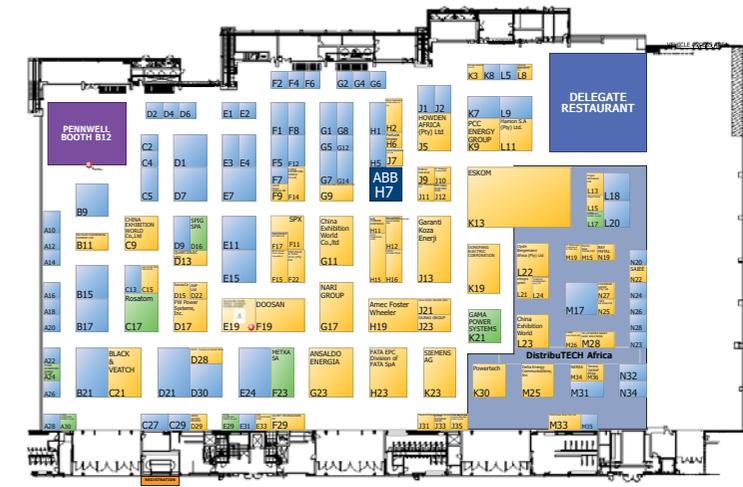

## Do you know?

**ABB is providing Eskom with advanced automation, control and instrumentation systems for Kusile, one of the world's largest clean coal power stations – a major infrastructure upgrade in South Africa.**

We look forward to welcoming you

Come and visit us at booth H7.

Our experts are available all three days to help you navigate the future of power generation in the world's fastest growing continent.
