

Patrik Westerlund

Global Product Manager – Underground Mine Automation, ABB

Patrik Westerlund has an M.Sc. degree in applied engineering physics from the University of Umea, Sweden.

After 4 years working in R&D for a mining company, he joined ABB in 2001. Patrik has been working as optimization specialist and lead engineer for projects in various industries, ranging from vehicle manufacturing, saw mills to process industries like pulp & paper and minerals industries.

In 2007, he worked as project manager for large automation projects and in 2012 he became Global Product Manager, responsible for ABB's product portfolio for underground mine automation.
