MyABB Supplier Portal- Supplier user login guide

MyABB Supplier Web Portal

Supplier user login procedure

1. Go to www.abb.com/supplying
2. Click on “My ABB Supplier Portal” tab to land on Supplier portal login page

The screenshot shows a web browser window with the address bar displaying `new.abb.com/about/supplying`. A blue arrow labeled '1' points to the breadcrumb navigation 'HOME → ABOUT → SUPPLYING'. The main heading is 'Supplying to ABB'. Below it, a paragraph states: 'ABB is committed to improving its supply base. Through collaboration with our business partners, we aim to enhance supplier relationships, ensure the highest quality standards and create a sustainable supply chain.' A sub-section titled 'Suppliers to ABB' includes the text: 'Here you will find useful information for current and future suppliers.' On the right, a large image shows a control room with multiple monitors. Below this image, a blue arrow labeled '2' points to a box titled 'My ABB Supplier Portal' with the text: 'The portal is a single entry point for suppliers to access relevant information, tools and trainings across ABB applications'. The bottom of the page features a row of four images: two workers in hard hats reviewing documents, a group of people in an office meeting, a modern city skyline at night, and a large industrial machine in a factory.

Supplying to ABB

ABB is committed to improving its supply base. Through collaboration with our business partners, we aim to enhance supplier relationships, ensure the highest quality standards and create a sustainable supply chain.

By providing quality and meeting delivery commitments to our customers, we can support their success. Therefore, as part of ABB's core values, we strive to set the highest quality standards for our products and services. This is why we view our suppliers as an integral extension of our global enterprise. Through collaboration with best-in-class suppliers, we ensure supplier compliance to ABB standards and continuous sustainable improvement, which is both transparent and efficient

Suppliers to ABB

Here you will find useful information for current and future suppliers.
