

Anders Sjoelin

Lead Division Manager North America

Local Division Manager US

Power Grids Division

Anders Sjoelin leads ABB's new Power Grids division in North America, having assumed the roles of Lead Division Manager North America and Local Division Manager US on January 1, 2016.

The Power Grids division was formed by merging ABB's Power Systems and Power Products divisions, creating a unified organization focused on power grid customers.

Prior to his current role, Anders served as President of ABB's Power Systems division in North America. Previously he held the position of Senior Vice President & General Manager for ABB's Grid Systems and Substations businesses in North America. Anders is based in Raleigh, North Carolina, home to ABB's Power headquarters on the Centennial Campus of NC State University.

Anders, a native of Sweden, joined ABB in 1991 working in several countries and regions in different management positions, including ABB's global headquarters in Zurich, Switzerland, before moving to the US in 2004.
