

The switchgear that sees everything

—

ABB Ability™ LV switchgear - MNS® Digital makes you ready for Industry 4.0, opening up new possibilities in intelligent devices, IoT and cloud technology. It gathers critical process data and with the integrated ABB Ability™ condition monitoring for electrical systems, it tells you what's going on across your operations. In other words, because it sees everything, you see everything.

—● **CUSTOMIZE**

Easily set up and upgrade your equipment to meet your exact requirements with MNS Digital's modular platform

—● **ANALYZE**

Critical process data from across your operations is always available to you in the cloud

—● **OPTIMIZE**

With insights from the data, make necessary adjustments to maximize the performance of your equipment

—● **ECONOMIZE**

Increase efficiency and reduce costs across your operations
