Synchronous Machine Training

10-12 April 2018 in Vasteras, Sweden

Dear all,

ABB Motors and Generators in Västerås, Sweden hereby have the pleasure of inviting you to our synchronous machines training! The training will be held at our facilities, starting Tuesday morning 10th of April and ending in the afternoon Thursday 12th of April.

The aim of the training is to give an understanding of large electrical machines and their applications.

The training is on synchronous machines in general, but will focus on machines produced in Västerås. However, participants will be introduced to the BU Motors and Generators product portfolio. The training will cover basic mechanical and electrical theory of synchronous machines. Topics such as control equipment, starting methods and service & maintenance will also be treated.

This training is mainly intended for external customers, but also for ABB employees and others with an interest in large electrical machines. People from different countries and backgrounds will participate, so it is an excellent opportunity to network and to learn more about our products.

There is a participant fee of 1200 € covering lectures, training material, lunch and refreshments Tuesday to Thursday plus an evening activity. However, all other costs such as accommodation, travels and daily allowance are not included in the price and are to be covered by the participants themselves. Training material and presentations will be in English. There are a limited number of participants for the training, so please send your application as soon as possible, no later than March 16th. Applications are accepted on a first come first serve basis.

Non-ABB employees enroll by sending a mail to motorsandgenerators.training@fi.abb.com. ABB employees that wish to participate enroll via [link](#). If you have questions regarding the training, please

contact Lisbeth Adamenko; e-mail lisbeth.adamenko@se.abb.com or phone; +46 21 329049. Final agenda and further details will be sent to the participants in the middle of August together with practical details with regards to transportation and locations. For any questions, please do not hesitate to contact Lisbeth Adamenko as per above.

We are very much looking forward to seeing you in Västerås!
