

## Impulse spring for ABB switches

Impressivo and Jussi switch construction has been upgraded. Switches can now be upgraded to Pushbuttons by adding a spring.

The spring is added to assortment and is available in 10 pcs/bag. Basically all switches can be equipped with the spring. For example in a 1+1+1 switch any of the 3 rockers can be individually updated to a pushbutton.

Original, high volume, pushbuttons will still be available.
