

COURSE DESCRIPTION

INTCV609

COM600 Station Automation

The goal

The aim of this course is to familiarize the participants with the configuration concept of Grid Automation Controller COM600. The participants will configure a Grid Automation Controller COM600 including gateway engineering and remote communication between COM600 and SCADA system.

Learning objectives

After this course the participant will be able to:

- Understand the configuration concept and methods of Grid Automation Controller COM600
- Use Station Automation Builder (SAB600) Tool
- Create simple project and connect REF615 to COM600 over IEC61850
- COM600 WHMI

Participant profile

System engineers and technical personnel who want to learn engineering of Grid Automation Controller COM600.

Prerequisites

Participants shall have good knowledge of communication techniques.

Topics

- Introduction to Grid Automation Controller COM600
- COM600 Station Automation Builder (SAB600) tool
- COM600 configuration step by step

Course type

This is an instructor led seminar with class room lectures, demonstrations, application and hands on practice.

The language of the course is English..

Laptop or tablet is required to have access to the e-documentation. Please bring your own device.

Duration

The duration of the course is two days.
