

Simplifying your world without limiting your possibilities.

The ACS880 drives are designed to tackle any motor-driven application, in any industry, whatever the power range. The drives can be flexibly connected to different automation networks, and through the use of direct torque control, they precisely control different motors such as AC induction and permanent magnet motors. Yet, despite the drives' wide-ranging capability, they are remarkably easy to use and integrate. To learn about our industrial drives and the benefits they can offer to you, visit abb.com/drives.
