

ABB NORTH AMERICA

Pinetops, North Carolina

Facility Overview

Location
3022 NC 43 North,
Pinetops, NC
27864

Operational since
1978

Number of employees
335

Offering
Instrument transformers,
sensors, fused cutouts,
disconnect switches, and
capacitor fuses

What we do in Pinetops

Design and manufacture power quality and power protection equipment for the electric grid. Major outputs from Pinetops include instrument transformers which reduce the current and voltage to allow characteristics of grid electricity to be measured and subsequently controlled. In addition, Pinetops manufactures sensors and a variety of protective equipment for the power grid, including overhead distribution cutouts, disconnect switches, and capacitor fuses.

Who we serve

Products manufactured in Pinetops are found throughout the electric grid and in neighborhoods, in-

cluding in substations, on transformers, and on power poles. Used primarily by electric utilities and other power equipment providers, our products enable safe, efficient and reliable electricity service to homes and businesses across the country.

ABB in the U.S.

ABB is a pioneering technology leader that works closely with utility, industry, transportation and infrastructure customers to write the future of industrial digitalization, increasing productivity and boosting efficiency.
