SEVILLA, SPAIN, SEPTEMBER 16-19 2019

ABB Control Systems
Annual Partner Conference 2019

SEPTEMBER 19, 2019 – TRAINING DAY		**LOCATION: FLOOR -1 AND GROUND FLOOR**
Morning sessions 8.30 am to 11.00 am (coffee break 9.45 am - 10.00 am)	**Select I/O System 800xA xStream Engineering in practice**	Sala Ibiza A + B (Floor -1)
	Sharpening your weapons: Gain a deep understanding of Select I/O and elaborate on 80 recommended engineering tools and workflow for maximum efficiency while enabling parall distributed engineering. Supported by live demonstrations and valid for 800xA 6.1 with AC 80 using any library, I/O family and communication protocol.	
	800xA / MOM Batch offering	Sala Sevilla (Ground Floor)
	Are you into Batch processes? Learn about the full potential of 800xA Batch (level 2) and how to complement it and improve batch production through analytics: Batch View, Investigate, Compare and Insight (level 3).	
	Freelance Lifecycle management	Sala Triana (Ground Floor)
	Looking for new business opportunities in a brownfield market? Freelance 2019 includes, among an updated HMI look & feel and multiple new features, a new AC 900F CPU with 4 communications slots. Gain insight on the extensive Freelance installed base and how bring it to the latest technology and security standards with this particularly suitable system version.	
	Manufacturing Operations Management Insights	Sala Ibiza C (Floor -1)
	Interested in Digital? Need a break from IoT presentations featuring lots of brain and cloud icons? Looking for a practical approach that provides customer value and can be delivered now? Then attend this session: we will have extensive live demonstrations of our Manufacturing Operations Management PIMS and how it fits in ABB's digital vision.	
11.00 am	Lunch	Patio Andalucia (Ground Floor)
Afternoon sessions 12.00 am to 2.30 pm (coffee break 1.15 pm - 1.30pm)	**Plant Asset Management insight**	Sala Ibiza A + B (Floor -1)
	Are your customers asking for IoT solutions? Gain insight into ABB's solution for Plant Asset Management: Industrial IoT applied to a field instrumentation use case. Solution architecture, device connectivity and management, OPC UA integration, Edge vs Cloud data storage and value-added apps will be covered. What is available today and our path forward.	
	Safety offering	Sala Sevilla (Ground Floor)
	Do you deliver Safety Instrumented Systems? ABB's High Integrity offering has expanded at many levels. Learn about the new AC 800M HI controllers, Select I/O with High Integrity and also our recently added range of flame scanners.	
	AC500 Deep dive	Sala Ibiza C (Floor -1)
	Do you have opportunities where a full blown DCS is an overkill? A full update on the AC500 PLC offering and the S500 I/O range including live demonstrations on its integration to AC 800M and 800xA.	
	Control room solutions	Sala Mallorca (Floor -1)
	Do your customers ask you about control rooms? Offering a Control room pre-study led by our experts might develop into an interesting business opportunity. A workshop about ABB's holistic control room solutions featuring the EOW-c: a new, compact version of the Extended Operator Workplace.
