

ABB North American Pulp and Paper Tour

ABB in pulp and paper

Expressway to profitability

ABB North American Pulp and Paper Tour brings the full breadth and depth of our portfolio, including the newest innovations in products and applications, right to your mill.

Our pulp and paper tour is a traveling showcase of the latest solutions and insights that enable papermakers to operate their facility to the max. With interactive product stations, plus a working demo of the ABB Ability™ Collaborative Operations Center, our tour brings a hands-on experience you can share with your entire team.

To schedule a visit at your mill,
email us at us-napnptour@abb.com

Featured products

Interactive displays will allow you to see the latest developments and products you've been considering – live and in person.

ABB Ability™ Collaborative Operations Center

Digital service delivery model that connects people from production facilities, headquarters and ABB to enable faster problem solving

ABB automation solutions

Unmatched connectivity and integration for process and quality control

Measurements, analytics, and instrumentation

Digitally enabled products and solutions that make selection and ownership easy

Pulp and process measurements

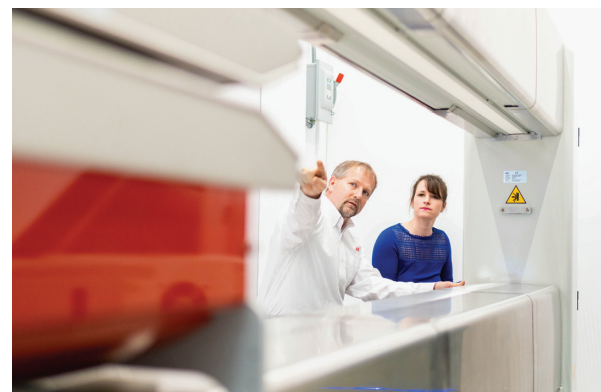

Accurate measurements to optimize pulp and stock preparation and ensure quality

Automated paper testing

ABB's L&W Autoline reduces testing variation and measurement uncertainty

CD Control Actuators

Continuous control for production and quality demands minimizes cross-machine profile variations and increases production efficiency

Quality Management System: NP1200 scanner

Online scanning for fast, accurate web measurement and unparalleled performance – even in the harshest mill environments

See you at the mill

Tradeshow on wheels

Your team can see, try and learn about the latest digital technologies and industry solutions you need to improve your process and bottom line – all in a mobile unit that we bring to your site.
