

Advanced digitalization, simplified Novolink™ modules for AF contactors

The all-new Novolink motor modules from ABB help drive your digitalization efforts forward. How? By streamlining the whole process. Novolink easily connects to ABB's market-leading AF contactors and replaces multiple monitoring devices. Less stock, reduced wiring effort and fewer components - all while providing the data you need for predictive maintenance. With the data available remotely, Novolink not only increases uptime, but also opens up new service and revenue opportunities. So if you're thinking about streamlining your digital efforts, think Novolink. **solutions.abb/novolink**
