

POWER SUPPLIES

## CP-C.1 high-performance range as alternative option for SD83x power supplies

Process industries and energy generation customers are aware of the light gray color (RAL7035) of the equipment used in standardized cabinets. Reliable high-end power supplies with small footprints are required for e.g. the IO system. The all new variants of the CP-C.1 – L high-performance power supply range fit perfectly into the harmonized look and feel of these cabinets. Directly access the updated data sheets via the order code, or by using ABB's landing page for power supply offering.

Order code	Description		Alternative order code	Alternative description	
3BSC610065R1	SD832 power supply, 5 A	ABB	1SVR361563R1001	CP-C.1 24/5.0-L	3333
