Operation

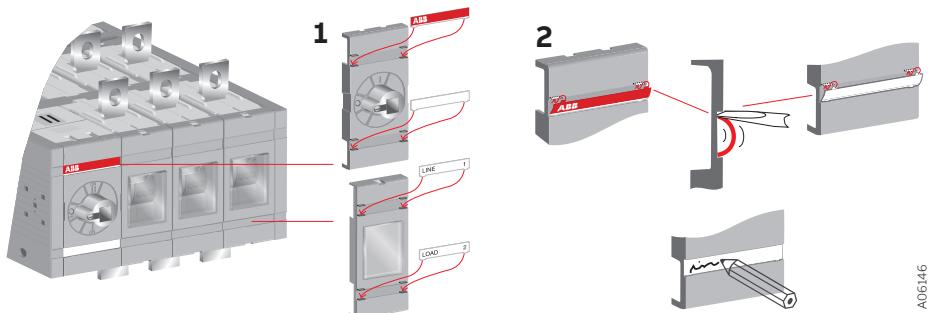

Connection diagram

Mounting positions

Label

Control circuit

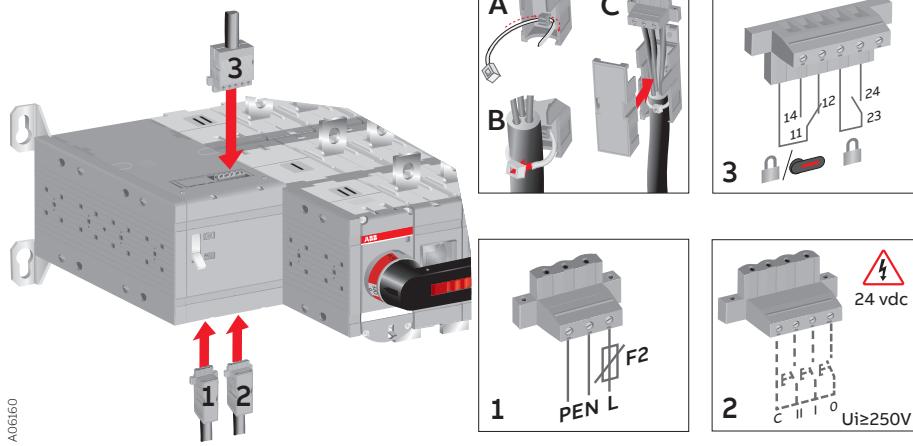

Only an authorised electrician may perform the electrical installation and maintenance of motorized switch. Do not attempt any installation or maintenance actions when a motorized switch is connected to the electrical mains. Before starting work, make sure that the switch is de-energised.

The control voltage (output C = 24Vdc) on the control terminal is non-isolated, see box 2 in the picture below.

When relay outputs are used with inductive loads (such as relays, contactors and motors), they must be protected from voltage spikes using varistors, RC-protectors (AC current) or DC current diodes (DC current).

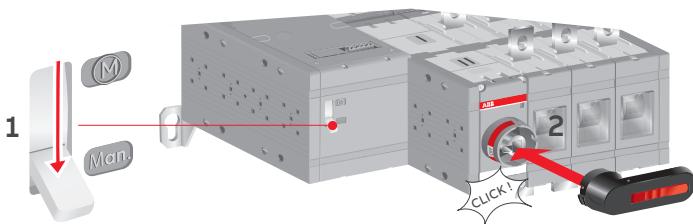

1. Terminal for motor operator voltage supply
2. Control terminal push buttons or selector switch
3. Terminal for state information of locking

Do not couple power for the control terminal. See the correct terminal for the power supply in the picture above.

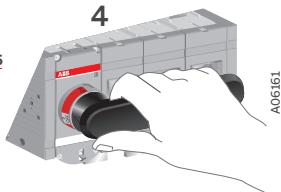

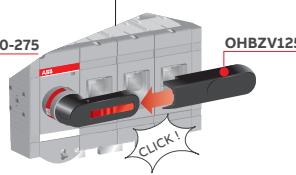

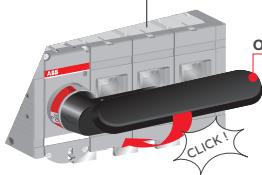

Manual operation

OTM160-250_Y_	OHBZV125
---------------	----------

A06161

Electrical operation is prevented when the handle is attached to the switch panel.

Manual control shall only be done using extension handle delivered along with the product.

Electrical operation

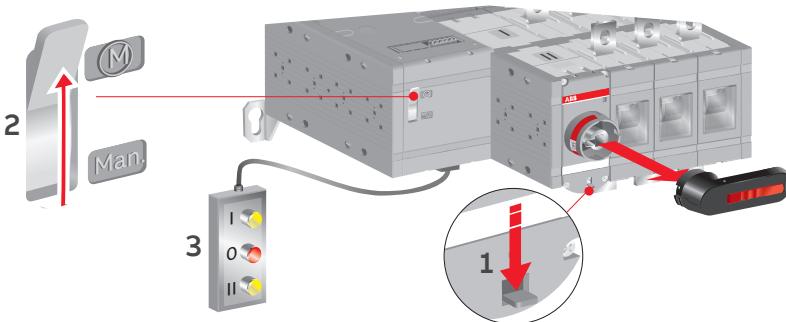

Never open any covers on the product. There may be dangerous external control voltages inside the motorized switch even if the voltage is turned off.

Never handle control cables when the voltage of the motorized switch or external control circuits are connected.

Exercise sufficient caution when handling the unit.

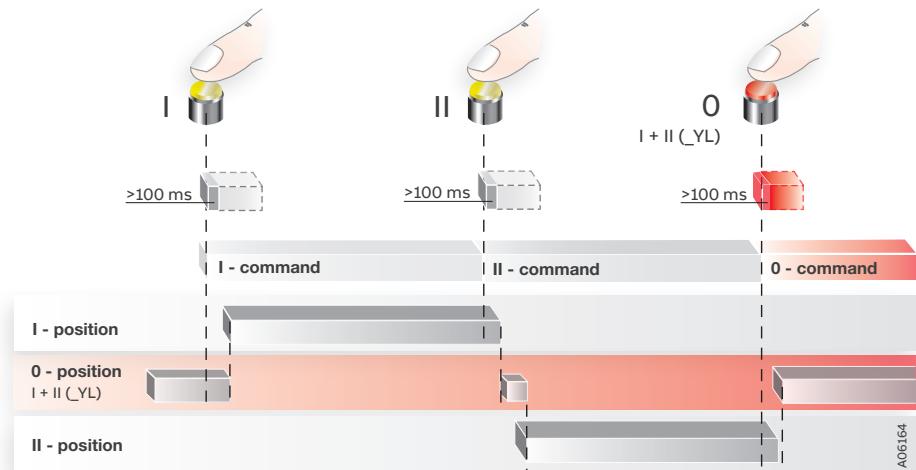

A06163

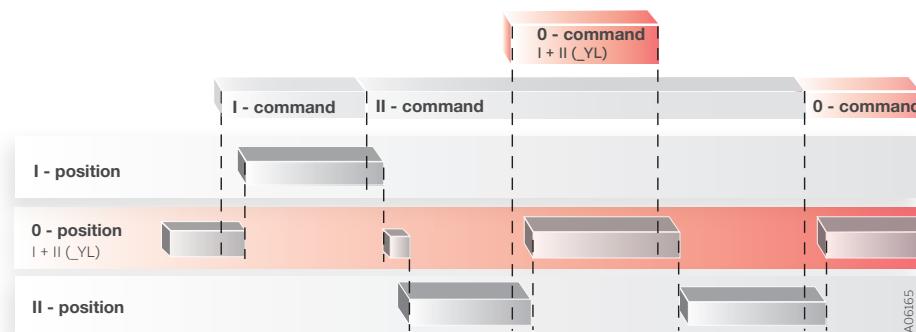

The motor operator is protected from overloading by a fuse (F1) under the motor operator. Only use the same type of fuse that is described on the label close to the fuse.

Impulse control

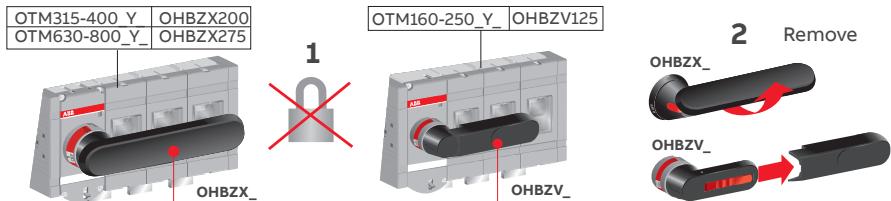

If a new command is given before the switch has reached the position of the previous command, the fuse (F1) may operate.

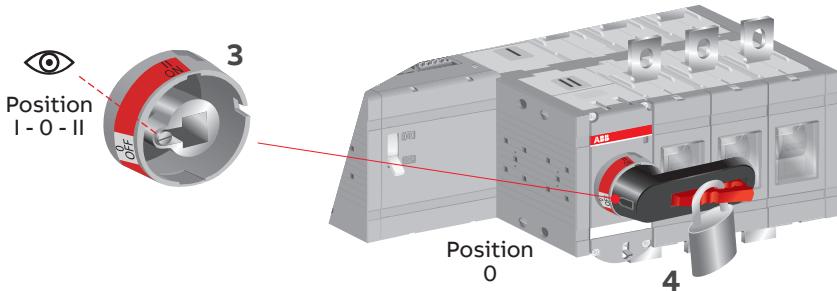

Continuous control

Technical data

Motor operator

Motor operator, control circuit	Value	Cabling
Rated operational voltage U [V]	220-240 Vac, 50-60 Hz	
Operating voltage range	0,85... 1,1 x U	
Operating angle	90° 0-I, I-0, 0-II, II-0; 180° I-0-II	
Operating time	See Table 2	
Protection degree	IP 20, front panel	
Rated impulse withstand voltage U _{imp}	4 kV	
Voltage supply	PE N L	1,5 -2,5 mm ²
F2	Max. MCB 16A	
Cable of the push-buttons (no SELV)	C II 10	1,5 -2,5 mm ²
Maximum cable length	100 m	
State information of locking (no SELV)		
Handle attached or motor operator locked	11-12-14 (C/O)	1,5 -2,5 mm ²
Locking motor operator	23-24 (NO)	1,5 -2,5 mm ²
Operating temperature	-25... +55 °C	
Transportation and storage temperature	-40... +70 °C	
Altitude	Max. 2000 m	

Table 1 General technical data of motor operators

Type	Voltage U _e [V]	Nominal current a) I _n [A]	Current inrush a) [A]	Operating time a) I-0, 0-I, 0-II, II-0 [s]	Operating transfer time a) I-II or II-I [s]	OFF-time when operating a) I-II or II-I [s]

Phase barriers

OTB_

A06159

Phase barrier type 68838 on:

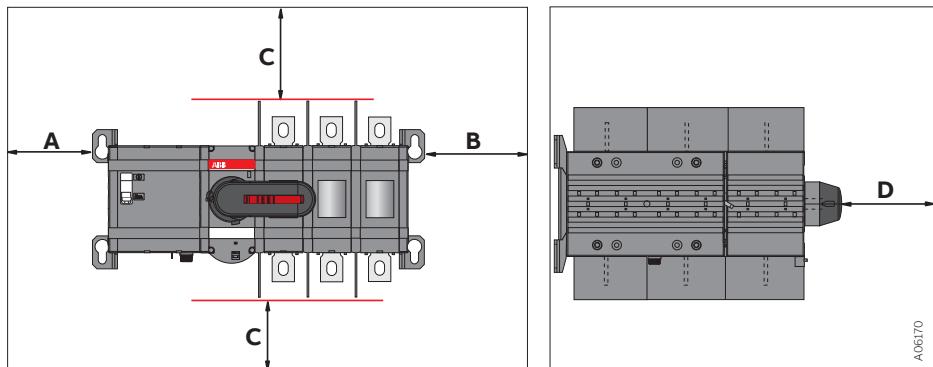

OT_600U_Y
OT_630-800E_Y

Phase barriers 68838 or shrouds must be used to maintain a clearance of 1 inch on the By-pass switch type OT_600U_Y, if lugs are wider than 39 mm/1.54 in.

The Type for the package of 6 barriers is OTB600/6Y.

Phase barriers 68912 must be used on By-pass switches type OT_600-800_Y, if the voltage is > 415 V.
