Device Access Point (DAP) selection

Dear Sir/Madam,

Use the table below to select the correct Device Access Point (DAP) version. DAP v2.1 added support for S2 Redundancy and require Softstarter v1.40 together with Anybus Profinet v1.56 or later.

Device Access Point (DAP) selection

Profinet module firmware version	Softstarter firmware version	
	v1.34 - v1.39	v1.40
v1.41	2.0	2.0
v1.56	2.0	2.1
