

Access all possibilities

Connecting to a smarter life of door entry communication, access control and video surveillance.

ABB-VideoControl
 ABB-AccessControl
 ABB Welcome® IP

Access all possibilities. Connecting to a smarter life.

Integrating a variety of systems to expand the possibilities for networking industrial, commercial and residential buildings. IP technology is the right solution for every demand and every need. Simply smarter, in all areas. Connecting home, work and life.

All under control Three systems fully connected

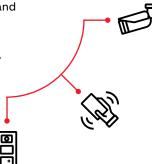

Door communication, access control, and video surveillance. ABB offers a complete range of smart products with all possibilities at your fingertips.

An open, closed system

Not only Smarter Devices from ABB can be seamlessly integrated in the entire system via IP network technology. Open programming interfaces and the included software development kit also make it possible to integrate third-party applications such as property management or messaging systems in the system environment. At the same time, centralized and decentralized control and installation options protect your system from unauthorized access.

Customized solutions for complete building automation – in commercial, public, and privately used buildings.

No matter what the challenge of your building is, door communication, access control and video surveillance has never been easier to control and monitor. A more than smart connection gives access to a wide range of possibilities and products within the well-known range of ABB.

Applications

- Apartments
- Apartment complexes
- Homes
- Office buildings
- Commercial properties
- Multifunctional buildings

Full integration of all systems

All products feature a sophisticated design and a high level of functionality. The three systems ABB-VideoControl, ABB-AccessControl, and ABB Welcome® IP now also feature an IP-based flexibility, that has a clear impact on the installation, operation, and maintenance of the smart home and building devices. They are suitable for even the most stringent requirements as well as for deployment in buildings of all kinds.

smartIP eco system

The platform does away with restrictions on the number of devices and range, making planning and installation for projects of every size far simpler.

A glance into the future: With the integration of the ABB-free@home[®] into the IP world, ABB extends its functionality many times over.

Ease of mind with modular systems Full control at your fingertips

Comfort

ABB always takes pride in user experience and innovates common network technology to create a totally smarter solution that can perfectly meet your every need. We believe smart living and working provide the basis for a more comfortable life.

Comforting to see

Minimalistic, aesthetic design with high-end material for both outdoors and indoors, the big screen with high resolution images and videos that please your eyes.

Comforting to listen

Full-duplex voice transmission allows a maximum of voice quality. Default and customizable ringtones are supported for better recognition.

Comforting to feel

The available app enables full remote control, status review and event notification at home or away. When technology overcomes distance, the feeling of home and building is pure pleasure.

Comforting to control

The integrated panel enables local control of of door communication, access control, video surveillance and Building Automation and more.

Security

To make you safer and enjoy your own time, ABB combines all the security functions that keep you all day long with peace of mind. With powerful anti-hacker technology installed, there is no need to worry about cyber security issues.

Security from duplication prevention

The high security card and reader prevents any duplicates of the card information

Security from network isolation

The in-built gateway of the indoor panel and Smart Access Point and networking video recorder makes the door communication, access control and video surveillance as a dedicated network system.

Cyber security and data privacy

The cyber security ensures the encrypted data transmission via Internet.

Security from user authentication

Different user groups or different authorities can manage or provide the legitimate access to open any locks at any time you like.

Simplicity

The real genius of this highly sophisticated system, however, is found in its ease-of-use. It's easy to set up users, search and play back recorded video, configure alarms, back up video, footage recordings and more.

Easy setup

Quickly create the building structure and scan the QR code of a device to place into the desired location, upload the information into devices. 1-2-3, Done!

Easy installation

Series of installation box for efficient and effective installation, plus wireless and PoE connection make the system really easy to install.

Easy setting

The parameter setting and interaction are down to its intuitive browser-free management software.

Flexibility

ABB's IP innovation provides flexible solutions that can satisfy your own living habit and style. No matter the kind of building, ABB is your trustworthy partner.

Flexible by scalability

Thanks to the IP platform, it is the ideal solution in residential home, community, commercial building, school, hospitals, without limitation of the distance and the capacity.

Flexible by modularity

Outdoor station, digital cylinder, indoor stations are integrated in a modular concept.

Flexible by centralization and decentralization

Local connection through home network or remote connection through MyBuildings portal powered by ABB Ability allow access from everywhere.

Door communication ABB Welcome[®] IP

The outdoor station series can be used in single homes to high-rises, as well as office buildings, industrial properties, hotels and hospitals.

01 Video Pushbutton outdoor station, Stainless steel

8

02 Video Keypad outdoor station, Stainless steel

03 Video outdoor station, touch 5", Stainless steel

04 Video Barbutton outdoor station, Stainless steel ABB Welcome® IP door communication provides you with a highly sophisticated system with HD video communication from outdoor to indoor and indoor to indoor. Distance is now only a matter of IP connectivity, what makes planning and commissioning the simplest matter. And the users will be happy due to a unique and intuitive user interface in all devices. The well-known remote access of the main functionality is ensured by the MyBuildings portal powered by ABB Ability.

- HD camera with infra-red ensures clear images even at night time
- Rustproof, waterproof IP54, vandal proof IK 07
- Integrated status indicator for door status and induction loop for hearing aid
- Clean design with thin installation in both flush and surface mounted
- Access control integration with keypad, DesFire card reader
- Brushed stainless steel and white matt aluminum optional

10	-
	all the second

HD quality in multi-communication channel

Thanks to IP technology, the residents of the home and building are always accessible to visitors with high definition images transmitted from multichannel bandwidth. It is much more colorful, brighter, clearer and no interference in communication.

One screen, all included

For IP Touch 5 inch outdoor station, different calling types are available, called by intuitively scrolling the directory or room numbers programmable locally or by management software.

Installation now easier

Full range of installation boxes are offered to ensure the quality installation in different situations regardless of concrete walls or cavity walls. The flat flush mounted (7mm) and flat surface mounted (25mm) are both available, both with a very attractive design.

Minimized articles of rain hood, same product with same column of outdoor stations variants, either 1, 2, 3, 4 or 5 modules combination.

From minimal modules to maximum possibilities The "snap-in" modular design enables the individual adaption to the system's size, design, functionality and budget to the respective requirements. Expansion and changes are also possible at any time by easily changing the modules.

01 Display For messages, code and building number

02 Bar pushbutton 3/6 or 4/8 pushbutton for visitor to press for call

03 Round pushbutton 1/2/3 pushbutton for visitor to press for calling

04 Round pushbutton 1/2/3 pushbutton for visitor to press for calling

05 Round pushbutton 1/2/3 pushbutton for visitor to press for calling

06 Keypad with alphanumeric input Digital input module for keypad outdoor station

07 Big display module With integrated transponder and keypad

08 A/V module with 720P camera Audio & Video module

Access control ABB-AccessControl

Access control via smart door locks is the application of choice for both commercial and residential projects. ABB-AccessControl ensures easy scalability, even for large-scale projects.

01 ANSI Mortice cylinder lock, US 02 ANSI RIM cylinder lock, US

12

ABB-AccessControl comes along with maximum encryption transmission to ensure all cyber security demands. It can be planned as standalone solution or can be easily part of a bigger Building system due to smart connectivity via IP. ABB-AccessControl as professional solution supports remote access and management possibilities that makes people's lives easier, thus for operators and end-users. The MyBuildings portal powered by ABB Ability provides the right and secure remote service.

- Built-in batteries
- Visual and acoustic indication
- · Emergency unlock (only for administrator)
- Key fob with various colors
- Remote firmware upgrade
- IP55

02

Maximum security by sophisticated encrypted communication The DESfire EV1 key fob with sophisticated

encryption technology makes duplication impossible. Plus the real-time cancellation to a lost or stolen key fob from management software, the door is secured all the time.

In addition, it is the encrypted radio frequency communication to transfer information from cylinder to Smart Access Point. Both repeater and IP-BLE gateway are also equipped with the same encryption mechanism.

User-friendly management system with intuitive web design

To intuitively visualize and manage the interlink between different user groups and door groups, is the key job of digital access control system. Administrator can quickly and easily execute all access plan updates on the system such as instant changes to user access privileges and can control the entire property. Meanwhile, administrator also can handle users' specific access rights to specific openings by setting the right mode from the choices of options.

Scalable to big project by IP-BLE gateway

ABB-AccessControl is not restricted with wireless transmission, which is superb in short distance projects. The versatile system can flexibly scale up thanks to the IP-BLE gateway. No limits of distance and capacity to decentralize each IP-BLE gateway to manage up to 16 cylinders. This makes the new and big construction projects as easy as small projects to plan and to install.

Video surveillance ABB-VideoControl

Video surveillance becomes safer, more convenient, and generally smarter, particularly for highly sensitive applications.

01 Outdoor IPC, 4K, Dome

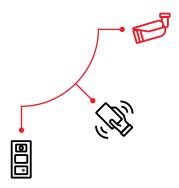

02 Outdoor IPC, 4K, Mini Dome

03 Outdoor IPC, 4K, Bullet

04 Outdoor IPC, 4K, Mini Bullet ABB-VideoControl as professional surveillance system comes along as stand alone solution or can be easily part of a bigger building system due to smart connectivity via IP. Local and online video storage keeps you flexible depending on different project security needs.

The MyBuildings portal powered by ABB Ability provides ABB-VideoControl secure cloud storage service to access the surveillance results even remotely.

- Encrypted IP communication
- 24/7 recording and management via NVR
- Remote access video surveillance

Advanced H.265 encoding helps to save up to 50% of bandwidth and storage

H.265 ITU-T VCEG is a new video coding standard technology that can improve compression efficiency robustness and error recovery capabilities. It also can help to improve real-time to reduce the delay, reduce channel acquisition time and a random access delay etc.

Perfectly networked system to protect your safety

With security attacks on the network infrastructure increasing, ABB has developed a series of secure technologies for the protection of data in its video surveillance solutions. ABB Secure Communication is a PC-level security for IP cameras. It has several features called data protection elements including data encryption IP communication encryption and verification. All these features will ensure the integrity of video evidence and overall data integrity of ABB IP video streams.

The right view is the key for professional surveillance in every area.

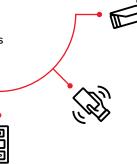

ABB Welcome® IP Touch

The IP Touch 7" and 10" control panels are IP-based and provide a far greater number of options for building control.

— 01 IP Touch 7", White glass

02 IP Touch 7", Black glass Powerful and beautiful. ABB's new IP Touch has the two most built-to-last colors: white and black glossy glass. The metal end strips are easy to change with varieties of material and colors optional. The integration with home and building automation makes it the best universal visualization panel in residential and nonresidential areas.

- With high resolution display
- Intuitive GUI on sliding screen
- Selection of installation box options ensures easy installation on all kind of walls
- Induction loop for hearing aid
- + Only 5_{16} " depth when flush mounted
- Both LAN and Wi-Fi version to connect to home network
- Easily connect mobile phone for app access

02

55/64" for 7"

01

Home and building dashboard

Main menu with easy settings for door communication, video surveillance and home automation. The new ABB's IP Touch ensures that comprehensive functions in a room or entire building are centrally visualized, easy and intuitively operated in a comfortable and efficient manner. One device, all kinds of possibilities. Reviewing of the snapshot image or recorded video when away from home, always feel confidence in knowing what is going on. It is also very easy when hosting a party to leave an audio message or set the automatic unlock time range.

Look thin, and act changeable

Our thin flush-mounted panel is really trend setting. Front frameless genuine glass in black and white plus easy changeable end strip with different color. Extremely slim in both flush and surface mounted situations represents this new series of indoor panels, in a combination of art and science.

App and Cloud Local and remote management

Every area of the house can be remotely controlled via the App. This helps the users to get access to every system from everywhere.

> The App is a cloud based integrated platform working with both iOS and Android. It allows you to use your smart phone or tablet managing the calls from IP Touch 7", digital cylinder and surveillance locally or remotely. You can also set up your customized App with as many steps as you wish. Thanks to MyBuildings portal, the remote connection is totally automated and managed with the highest level of security and data privacy. No special settings need to be made on the internet router for this solution.

Video surveillance

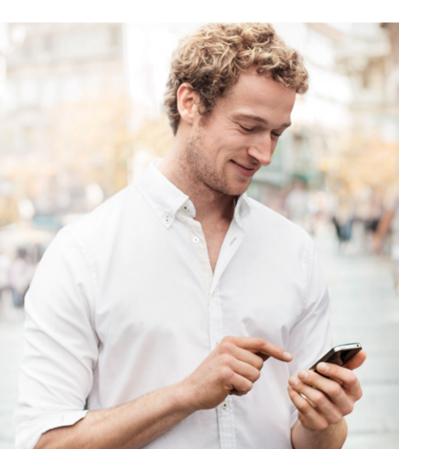

- Local and remote real-time live view
- · Record and playback video
- Snap shot and browse pictures
- Motion detection and instant alerts

Access control

- Local and remote unlock door
- Shows the unlock time in office mode
- Guest account creation and sharing

Door entry communication

- Local and remote unlock, light switching, mute call guard
- In-call volume and ringtone adjustment possible
- Internal intercom to App
- SOS
- Control the load on the associated actuator

Welcome App offers a lot of functions and applications depending on your daily habit. Most frequently used functions can be categorized in your easily recognizable place for comfort access and use.

With ABB MyBuilding Portal you can always connect

with your home or building anytime around the

world. Welcome App makes it possible to identify

and welcome the visitor, viewing the snapshot or

One App satisfies all the system combinations

Welcome App is a bottom up integrated platform. It can not only work separately with door communication, access control and video surveillance, but also works with two or all systems together. What is more, the App will be compatible to 2 wire analog Welcome system, the icons and interface will be automatically adapted to the system for you to use.

Configuration mode

Welcome App is not only for the end user, but also for the installer. After entering the configuration mode into the App, the QR code scanning can be utilized to create the building and floor structure efficiently that will help to easily visualize the project. Comfortable, easy and efficient commissioning to set up smartIP into a new benchmark for IP system.

History log review

Accessible anytime, anywhere

Keep track of visitors and guests going in and out of the building. Dedicated door with time-stamp and date of use, stored locally and in the cloud. Full control at your hands. That is your unique Welcome App.

Property Management and Service One software for all applications

The system can be equipped with guard unit in the property management rooms for easier communication indoor and outdoor stations.

Smart Management Software

The versatile system is also equipped with property management software, either with a web based version running in the Smart Access Point for small to medium size projects or PC software for big projects which can support above 500 devices. This makes maximum security and convenience possible for homes and buildings.

- Intuitive GUI with drag and drop features makes the configuration easy and efficient
- Flexible offering with standard version running server in the Smart Access Point (support devices <=500) or premium version running the server in PC (no limitation of devices managed)
- Support different versions of web-browser
- API for unlock integration with 3rd party system
- SOS message sending to all devices in case of emergency
- Easy to configure the App for digital cylinder system or CCTV system

The Smart Management Software guides the users easily through the setup of the applications

Easy management

Manage all your users in one place with just a few simple clicks. You have the opportunity to individually determine who enters when and where, who has the right to view which camera. And if you want to change that just log-in, make your changes and it's done.

Manage all connected devices

You can manage all connected devices, configure parameters for each device locally or remotely. E.g. to send the personalized Welcome message to the dedicated touch outdoor stations, or to push the floor plan during commissioning to all the indoor stations. You can also manage and upgrade firmware of connected devices, whose latest firmware are pushed from the internet.

Easy commissioning

Illustrate very clearly with graphical building and vivid device icons, just 3 steps for the commissioning. First, set up floor plan with its floors and room; second, assign each connected device in the existing floor plan; finally, combine different devices according to your requirements.

[] Î

Action among different systems

You can customize the "When-then" relationships between different systems. This allows rules to be created, such as implementing an automatic shading function: "if the door is released, activate camera to make a snapshot". Or you can create an automatic notification.

Enhanced security with record event log and receive notification and alert

Keep track of visitors and guests going in and out of the building; a photo and time-stamp will capture and log all door access events locally and in cloud-based storage, where you can conveniently access the event log at any given time.

Building-wide messaging

Communicate with residents easily by utilizing the building-wide messaging capability. Or send a management message to the indoor stations with scope easily determined by the property managers. Either to all or certain parts of the building or users.

IP Guard Unit for concierges Supports 24/7 building security

ABB highly regards the value of the guard unit in terms of its contemporary design and functionality; as well as modern touch display for a convenient user experience.

> The guard unit with desktop design provides access to various services using the intuitive icon menu on the touch screen. Communication is possible with IP touch panel, outdoor station and other guard units.

- One of the best modern and high end aesthetic designs
- Metal desktop with brushed aluminum for device body
- Capacitive 7" multi-touch screen
- High resolution 1024 x 600
- Intuitive GUI for easy scrolling operation
- Hands-free and handset communication to combine privacy and ease
- Unlock all doors or dedicated doors in case of emergency
- · Intercom with residents or the other guard
- Sending and receiving messages from indoor stations and Apps

All-round video surveillance

Thanks to the IP technology, the guard unit can realize video surveillance and audio communication through outdoor stations now. What is more, the community IP cameras and the standard ONVIF camera are now also possible as an additional video source to be viewed and stored.

Easy directory management

Considering the situation that requires hundreds or even thousands of names in the IP guard unit, it would be a terrible situation. Now thanks to the management software, the building directory list can be created and imported from the PC, which is more natural, comfortable and efficient.

Day and night interception

Don't worry the moment when the security guard is off work during the night. The Welcome IP guard unit now supports the manual or automated day mode and night mode switching with configurable time ranges determined by the guard that will improve the building security all day long.

Application Multiple connections and possibilities

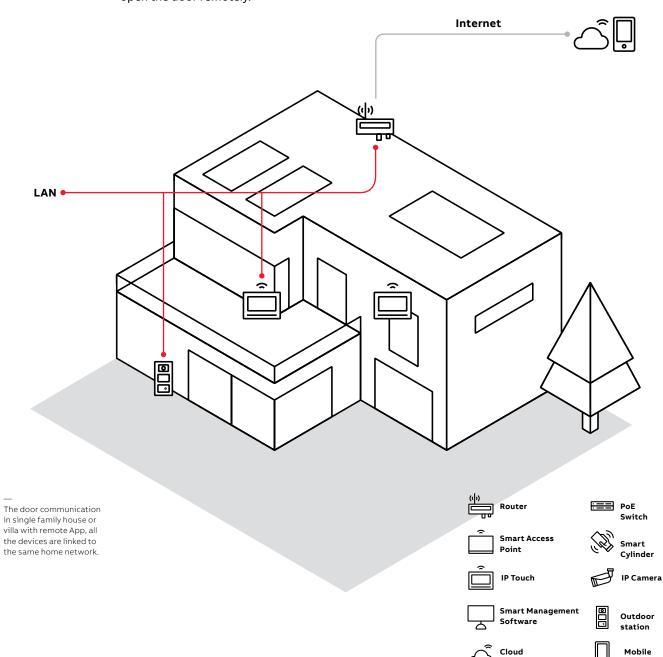

The IP connectivity brings all systems together to create a smartIP ecosystem for a holistic building automation solution in commercial, public or residential buildings.

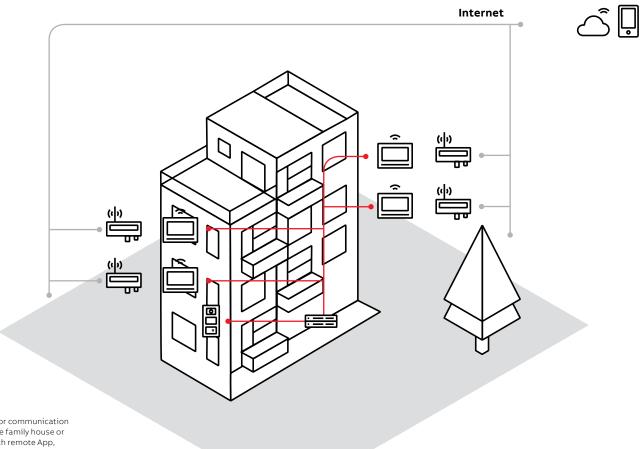

Applications Door communication

The door communication ABB Welcome® IP breaks the limitation of distance and apartment quantity. Property management can monitor all the entrances and welcome the guests. At the same time, owners can use the App to open the door remotely.

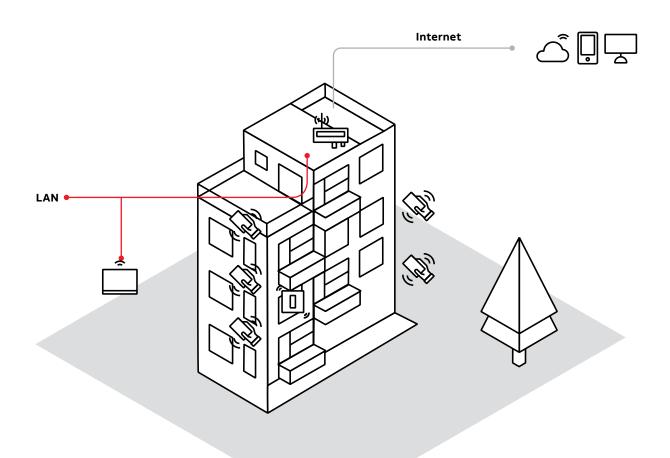

The door communication in single family house or villa with remote App, dedicated DES network is supported with higher security.

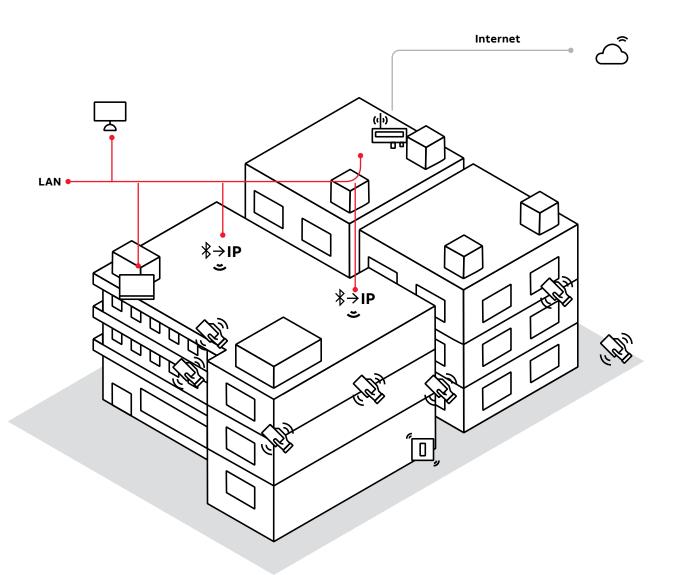

- Apartments need to replace existing door bell system by smart Access Point
- Small and middle size residential application such as apartments, where door locks are in range of smart Access Point
- Small office, with less than 16 doors

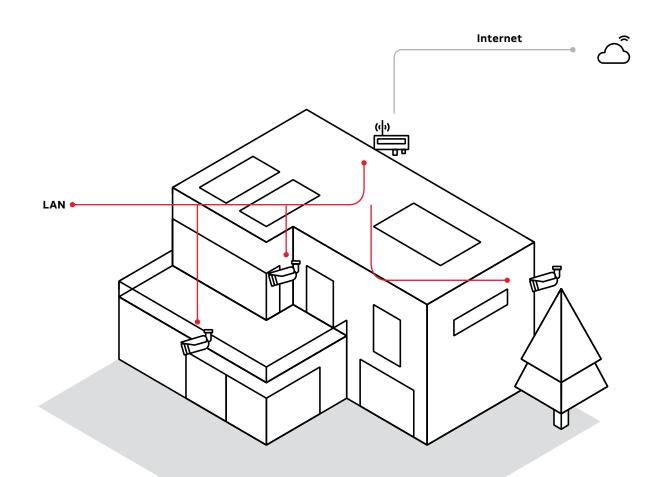

- Large size residence with many rooms and floors, where communication over backbone IP is easier because walls are too thick to transfer wireless signal
- Commercial application, e.g. hospital, school, with multiple doors and long distances from each door to control center

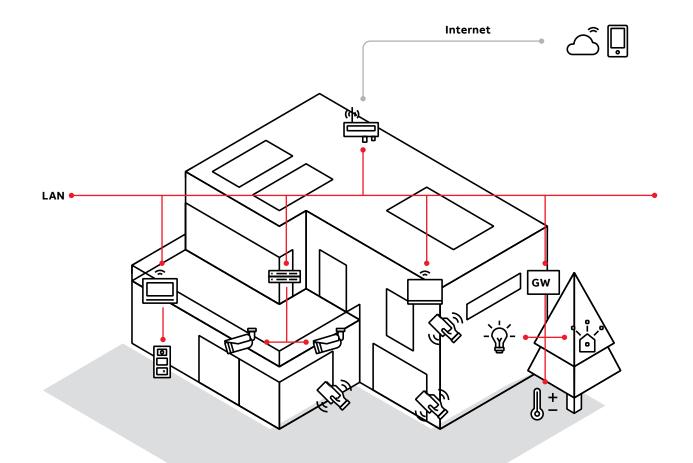

Applications Video surveillance

The video surveillance system of ABB-VideoControl can provide the public monitor and private monitor separately. The owner can monitor the public area. The video surveillance system can also combine with burglar system. It can send messages through App to the owner's cell phone.

Surveillance system in single family house or villa with remote App, Video can be recorded in cloud and/or NVR. APPLICATIONS

The door communication in single family house or villa with remote App, dedicated DES network is supported with higher security. 31
