

Just push it

Push-in Spring motor starting solution.

Easier than ever wiring is here. The all-new Push-in Spring motor starting solution is unmatched for its ease of use, opening up a new world of possibilities. Wiring is far more intuitive, eliminating the need for training and reducing the risk of cabling error. And for de-wiring, only one screwdriver size is needed. All this comes with connections that are as reliable as ever. So for speed, ease and reliability, just push it. abb.com/lowvoltage
