

DATA SHEET

DC562

Digital input/output module

1 Ordering data

Part no.	Description	Product life cycle phase *)
1SAP 231 900 R0000	DC562, digital input/output module, 16 configurable inputs/outputs, transistor output	Active
1TNE 968 901 R3101	Terminal block TA563-9, 9 pins, screw front, cable side, 6 pieces per unit	Active
1TNE 968 901 R3102	Terminal block TA563-11, 11 pins, screw front, cable side, 6 pieces per unit	Active
1TNE 968 901 R3103	Terminal block TA564-9, 9 pins, screw front, cable front, 6 pieces per unit	Active
1TNE 968 901 R3104	Terminal block TA564-11, 11 pins, screw front, cable front, 6 pieces per unit	Active
1TNE 968 901 R3105	Terminal block TA565-9, 9 pins, spring front, cable front, 6 pieces per unit	Active
1TNE 968 901 R3106	Terminal block TA565-11, 11 pins, spring front, cable front, 6 pieces per unit	Active

^{*)} Modules in lifecycle Classic are available from stock but not recommended for planning and commissioning of new installations.

2 Dimensions

3 Technical data

3.1 Technical data of the module

The system data of AC500-eCo apply.

Only additional details are therefore documented below.

Pai	rameter	Value
Pro	cess voltage UP	
	Connections	Terminal 19 for UP (+24 V DC) and terminal 20 for ZP (0 V)
	Rated value	24 V DC
	Current consumption via UP terminal	90 mA + 0.5 A per output (max.)
	Max. ripple	5 %
	Inrush current	0.000001 A ² s
	Protection against reversed voltage	Yes
Current consumption from 24 V DC power supply at the L+/UP and M/ZP terminals of the CPU/communication interface module		Ca. 10 mA
Galvanic isolation		Yes, between the input/output group and the rest of the module

Parameter		Value
	Isolated groups	1 group for 16 channels
Sui	rge voltage (max.)	35 V DC for 0.5 s
Ма	x. power dissipation within the module	4.8 W
Input data length		2 bytes
Output data length		2 bytes
Weight		Ca. 125 g
Мо	unting position	Horizontal or vertical
Co	oling	The natural convection cooling must not be hindered by cable ducts or other parts in the control cabinet.

No effects of multiple overloads No effects of multiple overloads on isolated multi-channel modules occur, as every channel is protected individually by an external fuse.

3.2 Technical data of the digital inputs/outputs if used as inputs

Parameter	Value
Number of channels per module	16 configurable inputs (24 V DC)
Distribution of the channels into groups	1 (16 channels per group)
Connections of the channels C0 to C15	Terminals 1 to 16
Reference potential for the channels C0 to C15	Terminal 20 (negative pole of the process voltage, name ZP)
Indication of the input signals	1 yellow LED per channel; the LED is ON when the input signal is high (signal 1). The module is powered through the I/O bus.
Input type according to EN 61131-2	Type 1 sink
Input signal range	+24 V DC
Signal 0	-3 V +5 V
Undefined signal	+5 V +15 V
Signal 1	+15 V +30 V
Ripple with signal 0	-3 V +5 V
Ripple with signal 1	+15 V +30 V
Input current per channel	
Input voltage +24 V	Typ. 5 mA
Input voltage +5 V	Typ. 1 mA
Input voltage +15 V	> 2.5 mA
Input voltage +30 V	< 8 mA
Max. permissible leakage current (at 2-wire proximity switches)	1 mA
Input delay (0->1 or 1->0)	Typ. 8 ms
Max. cable length	

Par	rameter	Value
	Shielded	500 m
	Unshielded	300 m

	Unshielded	150 m

4 System data AC500-eCo

4.1 Environmental conditions

Table 1: Process and supply voltages

Parameter		Value
24 \	/ DC	
	Voltage	24 V (-15 %, +20 %)
	Protection against reverse polarity	Yes
24 \	/ AC	
	Voltage	24 V (-15 %, +10 %)
	Frequency	50/60 Hz (-6 %, +4 %)
100	V AC 240 V AC wide-range supply	
	Voltage	100 V 240 V (-15 %, +10 %)
	Frequency	50/60 Hz (-6 %, +4 %)
Allo	Allowed interruptions of power supply, according to EN 61131-2	
	DC supply	Interruption < 10 ms, time between 2 interruptions > 1 s, PS2
	AC supply	Interruption < 0.5 periods, time between 2 interruptions > 1 s

NOTICE!

Risk of damaging the PLC due to improper voltage levels!

- Never exceed the maximum tolerance values for process and supply voltages.
- Never fall below the minimum tolerance values for process and supply voltages.
 Observe the system data and the technical data of the used module.

NOTICE!

Improper voltage level or frequency range which cause damage of AC inputs:

- AC voltage above 264 V
- Frenquency below 47 Hz or above 62.4 Hz

NOTICE!

Improper connection leads cause overtemperature on terminals.

PLC modules may be destroyed by using wrong cable type, wire size and cable temperature classification.

Parameter		Value
Temperature		
	Operating	0 °C +60 °C (horizontal mounting of modules)
		0 °C +40 °C (vertical mounting of modules and output load reduced to 50 % per group)
	Storage	-40 °C +70 °C
	Transport	-40 °C +70 °C
Hur	nidity	Max. 95 %, without condensation
Air pressure		
	Operating	> 800 hPa / < 2000 m
	Storage	> 660 hPa / < 3500 m

4.2 Creepage distances and clearances

The creepage distances and clearances meet the requirements of the overvoltage category II, pollution degree 2.

4.3 Power supply units

AC500 and AC500-eCo PLC devices are Class II/Class III devices and do not require a Protective Earth (PE) connection.

For proper EMC performance, all metal parts, DIN rails, mounting screws, and cable shield connection terminals are connected to a common ground and provide Functional Earth (FE). This is typically connected to a common reference potential, such as equipotential bonding rails.

Signal Grounds (SGND or GND) are used for signal reference and must not be connected to cable shields, FE or other signals unless otherwise specified in the specific device description.

For the supply of the modules, power supply units according to SELV or PELV specifications must be used.

Safety Extra Low Voltage (SELV) and Protective Extra Low Voltage (PELV)

To ensure electrical safety of AC500/AC500-eCo extra low voltage circuits, 24 V DC supply, communication interfaces, I/O circuits, and all connected devices must be powered from sources meeting requirements of SELV, PELV, class 2, limited voltage or limited power according to applicable standards.

A

WARNING!

Improper installation can lead to death by touching hazardous voltages!

To avoid personal injury, safe separation, double or reinforced insulation and separation of the primary and secondary circuit must be observed and implemented during installation.

- Only use power converters for safety extra-low voltages (SELV) with safe galvanic separation of the primary and secondary circuit.
- Safe separation means that the primary circuit of mains transformers must be separated from the secondary circuit by double or reinforced insulation. The protective extra-low voltage (PELV) offers protection against electric shock.

4.4 Electromagnetic compatibility

Table 2: Range of use

Application	
Device suitable only as Control Equipment for Industrial Applications.	

Table 3: Electromagnetic compatibility

Parameter	Value
Device suitable only as Control Equipment for Industrial Applications, including marine applications.	
IEC 61131-2, zone B	
State of the control	
Radiated emission according to	Yes
IEC 61000-6-4 CISPR11, class A	
Conducted emission according to	Yes
IEC 61000-6-4 CISPR11, class A	
Electrostatic discharge (ESD) according to	Air discharge: 8 kV
IEC 61000-4-2, criterion B	Contact discharge: 6 kV
Fast transient interference voltages (burst)	Power supply (DC): 2 kV
according to	Digital inputs/outputs (24 V DC): 1 kV
IEC 61000-4-4, criterion B	Digital inputs/outputs (240 V AC): 2 kV
	Analog inputs/outputs: 1 kV
	Communication lines shielded: 1 kV

Parameter	Value
High energy transient interference voltages	Power supply (DC):
(surge) according to	- Line to ground: 1 kV
IEC 61000-4-5, criterion B	- Line to line: 0,5 kV
	Digital inputs/outputs/relay:
	(24 V DC):
	- Line to ground: 1 kV
	(AC):
	- Line to ground: 2 kV
	- Line to line: 1 kV
	Analog inputs/outputs:
	- Line to ground: 1 kV
	Communication lines:
	- Line to ground: 1 kV
Influence of radiated disturbances	Test field strength: 10 V/m
IEC 61000-4-3, criterion A	
Influence of line-conducted interferences	Test voltage: 10 V
IEC 61000-4-6, criterion A	
Power frequency magnetic fields	30 A/m 50 Hz
IEC 61000-4-8, criterion A	30 A/m 60 Hz

4.5 Mechanical data

Parameter	Value
Mounting	Horizontal/Vertical
Wiring method	Spring/screw terminals
Degree of protection	PLC system: IP 20
	 with all modules or option boards plugged in with all terminals plugged in with all covers closed
Housing	Classification V-0 according to UL 94
Vibration resistance (sinusoidal) acc. to IEC 60068-2-6	All three axes
	2 Hz 8.4 Hz, 3.5 mm peak,
	8.4 Hz 150 Hz, 1 g
Shock test acc. to IEC 60068-2-27	All three axes
	15 g, 11 ms, half-sinusoidal
Mounting of the modules:	
Mounting Rail Top Hat according to IEC 60715	35 mm, depth 7.5 mm or 15 mm
Mounting with screws	M4
Fastening torque	1.2 Nm

4.6 Approvals and certifications

The PLC Automation catalog contains an overview of the available approvals and certifications.
