# DO571

## Digital output module

### 1 Ordering data

| Part no.           | Description  | Product life cycle phase *) |
|--------------------|--|-----------------------------|
| 1TNE 968 902 R2202 | DO571, digital output module, 8 DO, relay output                               | Active                      |
| 1TNE 968 901 R3102 | Terminal block TA563-11, 11 pins, screw front, cable side, 6 pieces per unit   | Active                      |
| 1TNE 968 901 R3104 | Terminal block TA564-11, 11 pins, screw front, cable front, 6 pieces per unit  | Active                      |
| 1TNE 968 901 R3106 | Terminal block TA565-11, 11 pins, spring front, cable front, 6 pieces per unit | Active                      |

\*) Modules in lifecycle Classic are available from stock but not recommended for planning and commissioning of new installations.

## 2 Dimensions

The dimensions are in mm and in brackets in inch.

## 3 Technical data

### 3.1 Technical data of the module

The system data of AC500-eCo apply.

Only additional details are therefore documented below.

| Parameter   | Value  |
|---|--|
| Process supply voltage L+   |  |
| Connections   | Terminal 20 for L+ (+24 V DC). The negative pole is provided by the I/O bus. |
| Rated value   | 24 V DC  |
| Current consumption via L+  | 50 mA  |
| Inrush current (at power-up)  | 0.0035 A²s   |
| Max. ripple   | 5 %  |
| Protection against reversed voltage   | Yes  |
| Rated protection fuse for UP  | Recommended; the outputs must be protected by a 3 A fast-acting fuse         |
| Current consumption from 24 V DC power supply at the L+/UP and M/ZP terminals of the CPU/communication interface module | Ca. 5 mA   |

| Parameter                                | Value   |
|--|---|
| Galvanic isolation                       | Yes, between the output group and the rest of the module  |
| Isolated groups                          | 2 (4 channels per group)  |
| Surge-voltage (max.)                     | 35 V DC for 0.5 s   |
| Max. power dissipation within the module | 2.0 W   |
| Weight                                   | Ca. 150 g   |
| Mounting position                        | Horizontal or vertical  |
| Cooling                                  | The natural convection cooling must not be hindered by cable ducts or other parts in the control cabinet. |

### No effects of multiple overloads

No effects of multiple overloads on isolated multi-channel modules occur, as every channel is protected individually by an external fuse.

## 3.2 Technical data of the digital outputs

| Parameter                                      | Value   |
|--|---|
| Number of channels per module                  | 8 normally-open relay outputs   |
| Distribution of the channels into groups       | 2 (4 channels per group)  |
| Connection of the channels O0 ... O3           | Terminals 10 ... 13   |
| Connection of the channels O4 ... O7           | Terminals 15 ... 18   |
| Reference potential for the channels O0 ... O3 | Terminal 14 (signal name R0 ... R3)   |
| Reference potential for the channels O4 ... O7 | Terminal 19 (signal name R4 ... R7)   |
| Relay coil power supply                        | Terminal 20 (positive pole of the process supply voltage, signal name L+). The negative pole is provided by the I/O bus.  |
| Indication of the output signals               | 1 yellow LED per channel; the LED is on when the output signal is high (signal 1) and the module is powered via the I/O bus   |
| Way of operation                               | Non-latching type   |
| Relay output voltage                           |   |
| Rated value                                    | 24 V DC / 24 V AC or 120/240 V AC   |
| Output delay                                   |   |
| Switching 0 to 1 (max.)                        | Typ. 10 ms  |
| Switching 1 to 0 (max.)                        | Typ. 10 ms  |
| Output data length                             | 1 byte  |
| Output current                                 |   |
| Rated current per channel (max.)               | 2.0 A (24 V DC / 24 V AC / 48 V AC / 120 V AC / 240 V AC, only resistive loads)<br>2.0 A (24 V AC / 48 V AC / 120 V AC, only pilot duty)<br>1.5 A (240 V AC, only pilot duty) |
| Rated current per group (max.)                 | 8 A   |
| Lamp load (max.)                               | 200 W (230 V AC), 30 W (24 V DC)  |

| Parameter                                 |                           | Value   |
|---|---------------------------|---|
| Spark suppression with inductive AC loads |                           | Must be performed externally according to driven load specification |
| Switching Frequencies                     |                           |   |
|   | With resistive loads      | Max. 1 Hz   |
|   | With inductive loads      | On Request  |
|   | With lamp loads           | Max. 1 Hz   |
| Output type                               |                           | Non-protected   |
| Protection type                           |                           | External fuse <sup>1)</sup>   |
| Rated protection fuse                     |                           | 5 A fast  |
| Short-circuit-proof / Overload-proof      |                           | No, should be provided by an external fuse or circuit breaker       |
|   | Overload message          | No  |
|   | Output current limitation | No  |
| Connection of 2 outputs in parallel       |                           | Not possible  |
| Lifetime of relay contacts (cycles)       |                           | 100.000 at rated load   |
| Max. cable length                         |                           |   |
|   | Shielded                  | 500 m   |
|   | Unshielded                | 150 m   |

<sup>1)</sup> Per group in case of group fuse protection. For each channel in case of channel-by-channel fuse protection. The maximum current per group must not be exceeded.

## 4 System data AC500-eCo

### 4.1 Environmental conditions

Table 1: Process and supply voltages

| Parameter  |                                     | Value  |
|--|-------------------------------------|--|
| 24 V DC  |                                     |  |
|  | Voltage                             | 24 V (-15 %, +20 %)  |
|  | Protection against reverse polarity | Yes  |
| 24 V AC  |                                     |  |
|  | Voltage                             | 24 V (-15 %, +10 %)  |
|  | Frequency                           | 50/60 Hz (-6 %, +4 %)  |
| 100 V AC ... 240 V AC wide-range supply                        |                                     |  |
|  | Voltage                             | 100 V ... 240 V (-15 %, +10 %)                                 |
|  | Frequency                           | 50/60 Hz (-6 %, +4 %)  |
| Allowed interruptions of power supply, according to EN 61131-2 |                                     |  |
|  | DC supply                           | Interruption < 10 ms, time between 2 interruptions > 1 s, PS2  |
|  | AC supply                           | Interruption < 0.5 periods, time between 2 interruptions > 1 s |

**NOTICE!****Risk of damaging the PLC due to improper voltage levels!**

- Never exceed the maximum tolerance values for process and supply voltages.
- Never fall below the minimum tolerance values for process and supply voltages. Observe the **system data** and the **technical data** of the used module.

**NOTICE!**

Improper voltage level or frequency range which cause damage of AC inputs:

- AC voltage above 264 V
- Frequency below 47 Hz or above 62.4 Hz

**NOTICE!**

Improper connection leads cause overtemperature on terminals.

PLC modules may be destroyed by using wrong cable type, wire size and cable temperature classification.

| Parameter    |           | Value  |
|--------------|-----------|--|
| Temperature  |           |  |
|              | Operating | 0 °C ... +60 °C (horizontal mounting of modules)<br>0 °C ... +40 °C (vertical mounting of modules and output load reduced to 50 % per group) |
|              | Storage   | -40 °C ... +70 °C  |
|              | Transport | -40 °C ... +70 °C  |
| Humidity     |           | Max. 95 %, without condensation  |
| Air pressure |           |  |
|              | Operating | > 800 hPa / < 2000 m   |
|              | Storage   | > 660 hPa / < 3500 m   |

## 4.2 Creepage distances and clearances

The creepage distances and clearances meet the requirements of the overvoltage category II, pollution degree 2.

### 4.3 Power supply units

 *AC500 and AC500-eCo PLC devices are Class II/Class III devices and do not require a Protective Earth (PE) connection.*

*For proper EMC performance, all metal parts, DIN rails, mounting screws, and cable shield connection terminals are connected to a common ground and provide Functional Earth (FE). This is typically connected to a common reference potential, such as equipotential bonding rails.*

*Signal Grounds (SGND or GND) are used for signal reference and must not be connected to cable shields, FE or other signals unless otherwise specified in the specific device description.*

For the supply of the modules, power supply units according to SELV or PELV specifications must be used.

 **Safety Extra Low Voltage (SELV) and Protective Extra Low Voltage (PELV)**

*To ensure electrical safety of AC500/AC500-eCo extra low voltage circuits, 24 V DC supply, communication interfaces, I/O circuits, and all connected devices must be powered from sources meeting requirements of SELV, PELV, class 2, limited voltage or limited power according to applicable standards.*

 **WARNING!**

**Improper installation can lead to death by touching hazardous voltages!**

To avoid personal injury, safe separation, double or reinforced insulation and separation of the primary and secondary circuit must be observed and implemented during installation.

- Only use power converters for safety extra-low voltages (SELV) with safe galvanic separation of the primary and secondary circuit.
- Safe separation means that the primary circuit of mains transformers must be separated from the secondary circuit by double or reinforced insulation. The protective extra-low voltage (PELV) offers protection against electric shock.

### 4.4 Electromagnetic compatibility

Table 2: Range of use

|  |
|--|
| <b>Application</b>   |
