

PRODUCT LIFE CYCLE ANNOUNCEMENT

ACS6000 (Generation 1)

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Full range of life cycle services and support

Limited range of life cycle services and support

Replacement and end-of-life services

Product subtypes concerned

ACS6000 (Generation 1)

Current life cycle status

The mentioned product subtype of ACS6000 drive is in Classic phase according to the ABB life cycle model outlined above.

Life cycle change announcement

The mentioned product subtype of ACS6000 drive will be transferred to the Limited phase 01.01.2025.

It is planned to keep the product subtypes in Limited phase until the end of 2029.

Product availability in Limited phase

During the Limited phase the mentioned product subtype is not available for sale.

Recommended actions

In Limited phase the life cycle services will have only limited availability. It is therefore not guaranteed that required maintenance material will be available for the mentioned product subtype.

To ensure reliable operation, it is therefore highly recommended to apply the “ACS6000 Modernization UCU-26” service which will bring back the drive to Active phase according to the ABB life cycle model. After modernization the drive will follow the life cycle plan of the product subtype “[ACS6000 \(Modernized with UCU-26\)](#)”

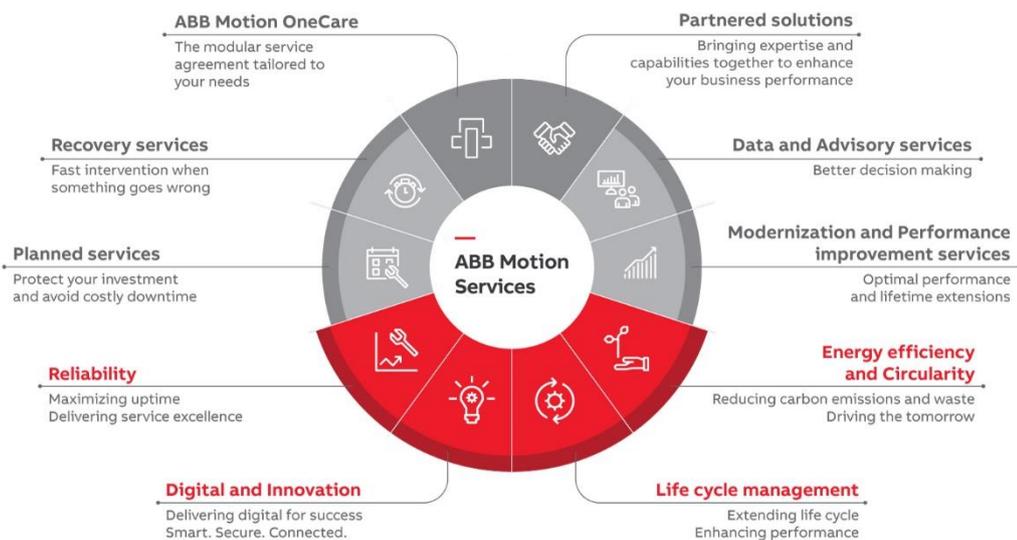

Maintenance recommendations are presented in the ACS6000 preventive maintenance schedule document.

Service availability in Limited phase

Trainings (e-learnings, classroom, on-site, virtual) ¹
Spare parts ¹
Preventive Maintenance ¹
Inspection and Diagnostics ¹
Technical Support ¹
Remote Support ¹
On-site repair ¹
