Steel City® metallic boxes and covers rationalization project

Dear valued customer:

ABB is committed to strengthening our relationships with our distributor partners by leading the market with the best products and service. As we strive to improve our service and product offering, we have completed a yearlong project focused on Steel City product lifecycle management. The result of this project was the identification of Steel City products that will be obsolete.

The attached spreadsheet contains a list of items that we will be retiring. These SKUs will be moved from active production 90 days from this announcement. Once the products are no longer being produced and the remaining inventory on hand is depleted, the SKUs will become obsolete.

We thank you for your understanding of these changes as the Steel City product management team works tirelessly to deliver the best products and services to the electrical market. Our goal and continued focus is to be as efficient as possible so we can meet our customers' expectations of quality, delivery and service. Thank you for your partnership and continued support of ABB Steel City products.

Sincerely,

ABB Steel City Product Management
