High Dynamic Performance (HDP) motors

Full range of machinery motors optimized
for high power density

Extensive range for machine builders

ABB's powerful HDP motors are available in a wide range of frame sizes, enabling you to get everything you need from one supplier

- ABB's HDP motors are offered in frame sizes 80 to 400 up to megawatt-class, with liquid-cooled and high-speed variants available in selected frame sizes
- ABB's HDP motors have a very high power density, which means that they provide more power to the machine applications – given a certain motor size – than conventional machine motors (e.g. Process performance motors)
- ABB's HDP motors are the optimal solution for high-torque machine applications such as extruders, cranes, test benches, etc.

Precise motor control

ABB is particularly renowned for its optimized motor and variable-speed drive (VSD) packages, providing precise motor control and maneuvering capabilities in a wide variety of variable-speed applications throughout general industry including pumps, fans and compressors.

High-torque applications

Excellent control and maneuvering capabilities are, of course, also attractive to machine builders and their customers in high-torque applications such as extruders, wire drawing machines, test benches and cranes – and well provided by packages combining ABB's High Dynamic Performance (HDP) motors and VSDs into complete solutions.

A history from DC to AC

Historically, industrial machinery was driven by DC motors on account of their superb speed control. However, with the emergence of variable speed drives (VSD) in the 1980s, it became possible to control the speed of AC motors, making them a viable alternative technology.

Ever since, specialized AC motors with square cross-section frame design, such as ABB's HDP motors, have been gradually replacing DC motors. The square frame design and a high overload capacity give HDP motors an excellent dynamic response due to the low moment of inertia.

Based on simple induction technology, specialized AC motors have proven more cost effective and service friendly than the previous DC motors – and today dominate the market both for retrofitting and for new machine designs.

Why to choose ABB's HDP motors?

Figure 2: Three variants of ABB's HDP motor in frame size 160 with different cooling arrangements.
From left: air cooled (ET - IP55) with axial fan, air cooled (FT - IP23) with radial blower, liquid-cooled (LT - IP55).

Frame-size and technology range

Motor series	80	90	100	112	132	160	180	200	225	250	280	315	355	400
M3ET (IP55 fan-cooled)	●		●		●	●	●	●	●	●	●	●	●	●
M3FT (IP23 blower cooled)			●		●	●	●	●	●	●	●	●	●	●
M3LT (IP55 liquid-cooled)	●	●	●	●	●	●	●							

Figure 3: Frame sizes range from 80 to 400 with outputs from 2 kW to 2,000 kW. Different cooling options are available, including liquid cooling, depending on frame size.

1 A replacement for every machine

The first OEM requirement that any motor provider must be able to meet is an extensive product range. Frame sizes for machine motors are relatively fixed and “standardized,” and replacement motor providers must be able to respond with a model that fits the machine type in question. ABB provides drop-in replacement HDP motors for every commonly requested frame size.

2 Technology variants for special needs

With its upgraded HDP motor range, ABB can offer machine builders frame sizes between 80 and 400, and output capacities up to two megawatts – as well as alternative designs variants such as high-speed and liquid-cooled motors. All motors are designed for use with a VSD, and ABB can provide matching motor and VSD packages across the frame-size range – along with professional support and services on a global basis.

3 Extending your offering

ABB's HDP motor and VSD solutions create new opportunities for machine builders to improve and extend their customer offering. Thanks to ABB motors very high-power density, machine builders are offered a dual benefit: designing more compact new machines while boosting the performance of existing machine types using more powerful replacement motors.

Performance and compactness

Figure 4: ABB HDP motors are always used with a drive. They are developed and tested as a system solution together with a matching VSD to ensure optimum motor control and machine maneuvering.

ABB has long been pushing the motor power density frontline through repeated technology innovation and cooling breakthroughs. Our motors are universally acknowledged as the most compact in general industry. With our re-engineered HDP motor range, we also invite machine builders to benefit from our high-power density.

Machine builders benefit from the exceptionally high-power density of ABB's HDP motors in two ways:

1 Retrofitting opportunities:

In retrofitting, i.e. in motor replacement projects, it's important to match the frame size of the existing motor with a minimum of additional engineering work. ABB's full range of drop-in replacement motors add value through their superior power density. With the same speed and torque as the old motor higher power density, an ABB HDP motor will boost machine performance and offer machine builders a strong new competitive edge.

2 New machine-design opportunities:

Due to floor-space constraints, machine compactness is an increasingly important product differentiator requested by machine builders and their customers. The compactness of the motor can have a significant impact on the compactness of the machine itself, depending on machine type and category. A high-power density means OEMs can design more compact machines by selecting a motor of a smaller frame size than compared to previous generation for a given output.

Superb control and maneuvering

Optimized motor and drive operation

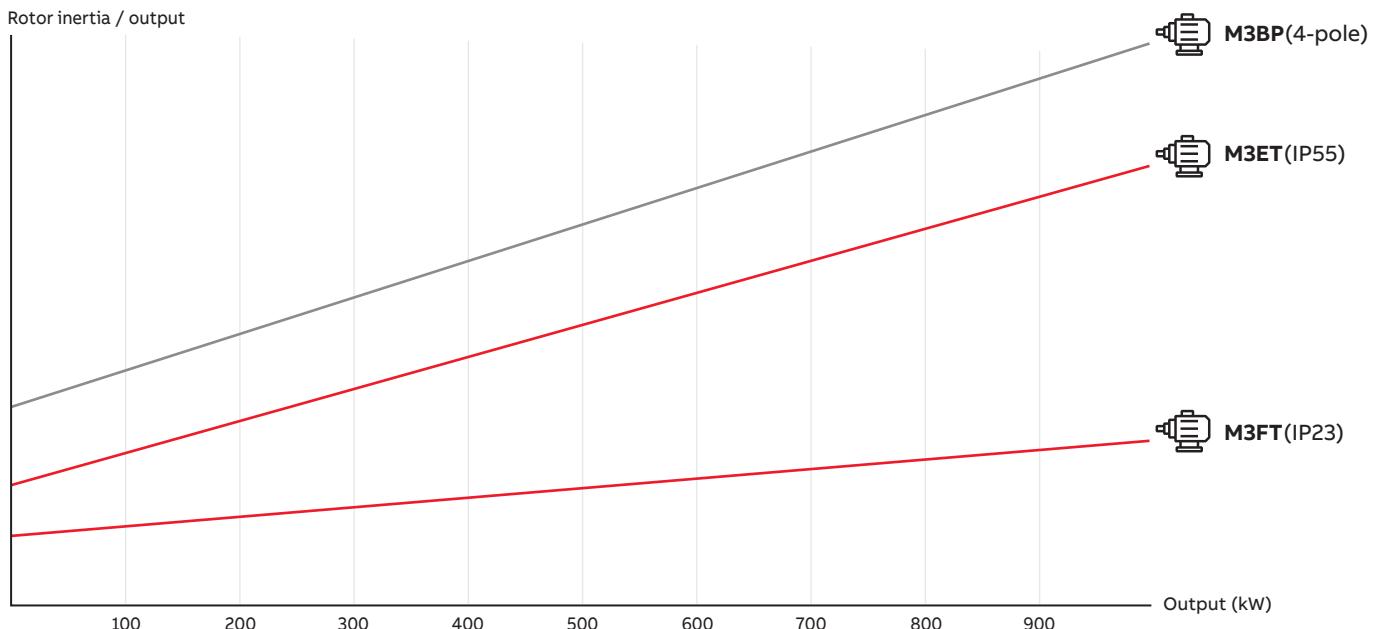

Figure 5: The chart shows a comparison between the inertia of two ABB HDP-motor variants and a comparable ABB Process performance motor (M3BP) at different outputs (figures based on a speed of 1,500 rpm).

ABB's packaged solutions, containing motor and matching VSD, are optimized as complete drive systems. They excel in motor control and enable precise maneuvering of any type or size of machinery.

1 Lab tested performance

Machine builder must be able to expect the drive system to provide excellent motor control and maneuvering, reliably and consistently. ABB's HDP motors draw heavily on a long tradition of developing, testing and optimizing motor and VSD together as complete drive system solutions. The matching of motor and drive is inherent in every variable speed application motor from ABB. Optimized on system level, these solutions are also highly energy efficient.

2 Making full use of VSD capabilities

To make full use of ABB's VSDs – including flexibility to optimize processes and control, reliability to reduce downtime, and efficiency to reduce energy use and carbon emissions – the motor's technology solution must be up to the challenge. ABB's HDP motors are designed to enable fast motion control and high maneuvering precision due to their low inertia and high overload capacity. Low-inertia motors can more successfully shift rotational direction to enable, for example, faster back-and-forth machine motion.

Flexible motor solutions

Adapted to customer needs

Figure 6: Space constraints in the end user application may be a cause to customize the motor, e.g. re-positioning the terminal box.

Even a complete motor range, including technology variants such as liquid-cooled and high-speed motors, may not be sufficient to meet all the specific needs of thousands of machine types and sizes in the market. ABB therefore offers customization of its HDP motors.

1 Modular platform

ABB keeps a limited, yet sufficiently large, number of standardized components in stock to enable design flexibility. This allows us to meet most machine-building requirements without extending delivery times. When developing our HDP motor range, we made sure to include all the commonly requested frame sizes and technology variants such as liquid-cooled, high-speed and megawatt class alternatives.

2 Customization

Further design flexibility is achieved by developing adjustable key components. Examples include flexible mounting of the terminal box, which makes it easy to connect cables regardless of machine-specific space constraints, and programmable encoders which allow OEMs and end-users to adapt to changing needs instead of keeping a set of encoders in stock.

3 Easy installation

Installation friendliness is another prioritized part of ABB's manufacturing philosophy. It must be easy to install, for example, a replacement motor into an existing machine without excessive engineering work. ABB has considered installation simplicity in everything from making connection points easily accessible to simple installation of accessories, such as cooling fans, encoders and brakes, whether of ABB or third-party make.

Availability and delivery precision

Across the globe

Figure 7: ABB has an extensive portfolio of global services to meet OEM and end-customer needs.

Unrestricted global use

ABB HDP motors are compliant with the IEC 60034 standard and hence prepared for unrestricted global use. All frame sizes, technology variants and customizations are available to machine builders worldwide, and support is provided to OEMs and end users through ABB's global services organization.

ABB has been a leading provider of electric motors for more than 130 years. Millions of ABB motors are currently in operation in numerous industrial applications worldwide, and appreciated for their simple, yet advanced, modular design, reliability and longevity.

High Dynamic Performance motors with variable speed drives

Full range of products to meet your motor and machine control needs

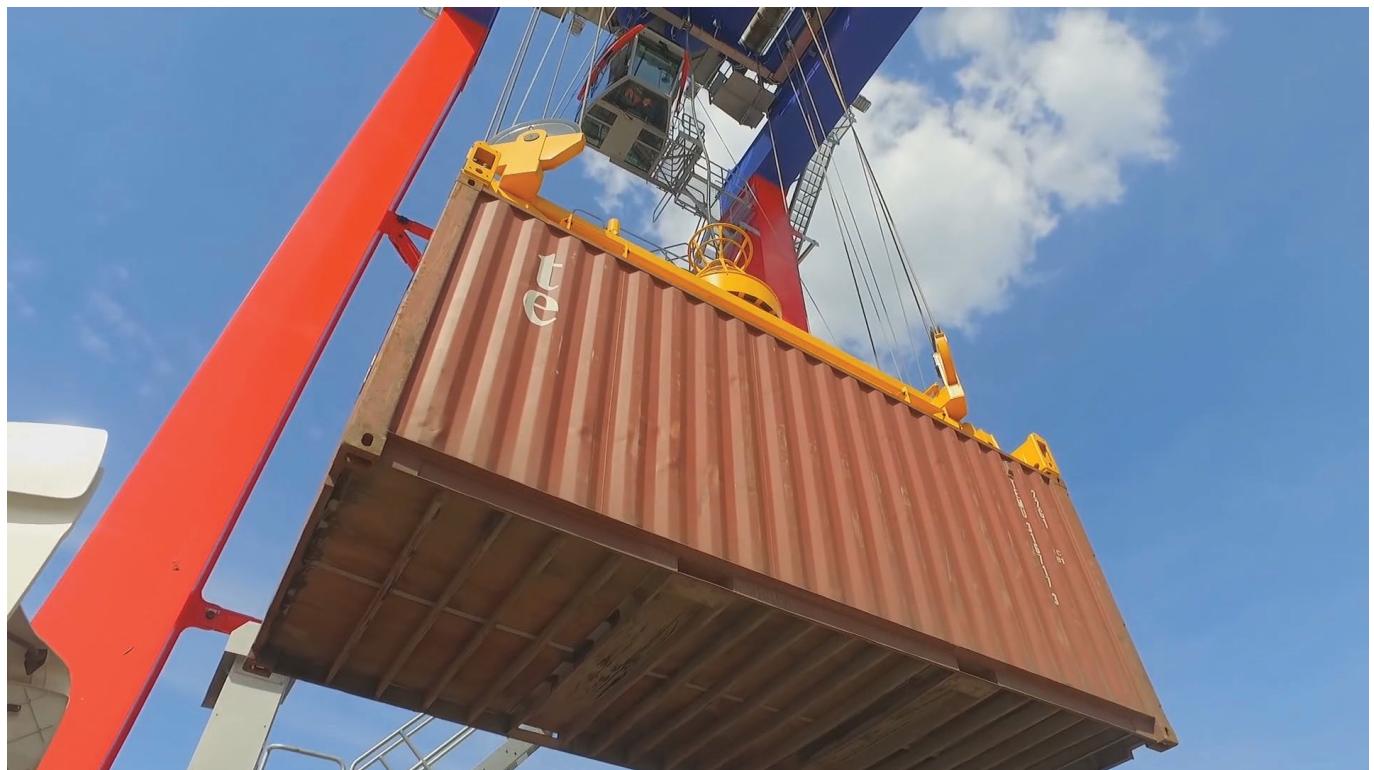

Figure 8: ABB offers a comprehensive range of high performance products dedicated to crane applications, that need fast motion control and precise maneuvering.

A wide selection of ABB drives and programmable logic controllers is available for HDP motors and machine control. Our drive products offer flexible choices ranging from different enclosure alternatives and safety features to control performance. Most of the drives are equipped with direct torque control (DTC) enabling premium motor control, even without a feedback device. The AC500 range of PLCs offers a scalable platform for machine control with powerful programming and supervision software. Automation Builder is a new PC suite integrating PLC and drive programming with many other useful features for engineering productivity.

Variable speed drives

ABB ACS880 drives

Figure 9: ABB ACSS880 drives

The low voltage ACS880 drives are compatible with virtually all of your processes, automation systems, users and business requirements. The extensive power and voltage range, high flexibility and performance as well as the long lifetime and robust design make ACS880 drives the optimal choice for a wide range of industrial applications. The ACS880 drives are available as single drives, drive modules and multi-drives, including ultra-low harmonic drive and regenerative drive variants.

ACS880 series – Uncompromised productivity

- Wide power and voltage range – from 0.55 to 6000 kW and 200 to 690 V
- Compatible with virtually all AC motors including permanent magnet and highly efficient synchronous reluctance motors

- Premium motor control with DTC giving e.g. accurate speed and torque control throughout the speed range even without a feedback device
- Extensive functional safety offering
- Connectivity to all automation networks and remote monitoring solutions

For further information, see new.abb.com/drives/low-voltage-ac/industrial-drives and new.abb.com/drives/low-voltage-ac/machinery

Variable speed drives

ABB servo drives

Figure 10: ABB MicroFlex e190 and MotiFlex e180 servo drives

MicroFlex e190 and MotiFlex e180 drives deliver versatile motion control performance, capability and dependability to power machine innovations. Flexible connectivity with Ethernet and motor feedback technologies is highly integrated and optimized for demanding motion applications.

MicroFlex e190 MotiFlex e180 series – Powering machine innovations

- Single/three-phase operation voltage from 200 to 240 VAC/ 480VAC
- Software selectable Ethernet protocols including EtherCAT, POWERLINK, Modbus TCP/IP, EtherNet/IP and PROFINET IO
- Advanced motion programming language Mint for multitask controls such as communication, logic, motion and HMI interaction
- Supports the HIPERFACE DSL one cable solution
- 200% and 300% overload capacity up to 3 s
- Integrates the safe torque off (STO) function which complies with the standard EN 61800-5-2
- Flexible options for function expansion

Variable speed drives

ABB's PLC Automation products

Figure 11: ABB programmable logic controllers (PLCs)

Figure 13: ABB Ability™ Automation Builder

Programmable Logic Controllers PLCs - For high performance and flexibility

- The AC500-eCo, AC500, AC500-XC and AC500-S scalable PLC ranges provide solutions for small, medium and high-end applications
- The AC500 PLC platform offers different performance levels and is the ideal choice for high availability, extreme environments, condition monitoring, motion control or safety solutions

ABB Ability™ Automation Builder

- Is the integrated software suite for machine builders and system integrators requiring state-of-the-art productive machine and system automation
- Combines the tools required for configuring, programming, debugging and maintaining automation projects from one

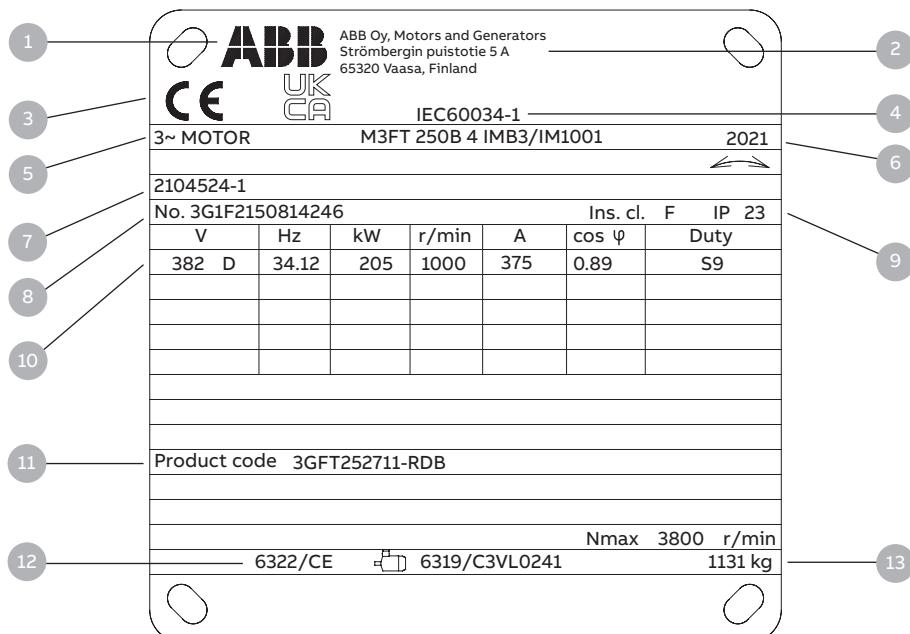

Figure 12: HMI (human-machine interface)

HMI (human-machine interface) – Clear in touch with productivity

- CP600-eCo, CP600 and CP600-Pro control panels offer a wide range of features and functionalities for maximum operability
- ABB control panels are distinguished by their robustness and easy usability, providing all the relevant information from production plants and machines at one single touch

Variant codes

High Dynamic Performance IP55 motors

Variant codes specify additional options and features to the standard motor. The desired features are listed as three-digit variant codes in the motor order. Note also that there are variants that cannot be used together.

Code/Variants	Frame size										
	80	100	132	160	180	200	225	250	280	315	355
Administration											
100	Special design according to quotation (production orders).	-	-	-	-	-	•	•	•	-	-
529	Customer witnessed visual inspection of complete order line.	•	•	•	•	•	•	-	•	•	•
531	Sea freight packing	•	•	•	•	•	•	-	•	•	•
533	Wooden sea freight packing	-	-	-	-	-	-	-	•	•	•
590	Mounting of customer supplied part other than coupling.	•	•	•	•	•	•	-	•	•	•
683	Prepared for ABB Ability Smart Sensor	•	•	•	•	•	•	•	•	•	•
684	ABB Ability Smart sensor mounted	•	•	•	•	•	•	•	•	•	•
999	Case specific design requiring a quotation	•	•	•	•	•	•	•	-	-	-
Balancing											
417	Vibration acc. to Grade B (IEC 60034-14).	•	•	•	•	•	•	-	•	•	•
423	Balanced without key.	•	•	•	•	•	•	-	•	•	•
424	Full-key balancing	•	•	•	•	•	•	-	•	•	•
Bearings and Lubrication											
036	Transport lock for bearings.	•	•	•	•	•	•	•	-	-	-
037	Roller bearing at D-end.	•	•	•	•	•	•	-	-	-	-
041	Bearings regreasable via grease nipples.	-	•	•	○	○	○	○	○	○	○
043	SPM compatible nipples for vibration measurement	•	•	•	○	○	○	○	○	○	○
057	2RS bearings at both ends.	•	•	•	•	•	•	-	-	-	-
107	Pt100 2-wire in bearings.	-	-	-	•	•	•	•	•	•	•
130	Pt100 3-wire in bearings.	-	-	-	•	•	•	•	•	•	•
194	ZZ bearings greased for life at both ends.	○	○	○	•	•	•	-	-	-	-
420	Bearing mounted PTC thermistors.	-	-	-	-	-	-	-	•	•	•
640	High speed ball bearing at D-end.	•	•	•	•	•	•	-	-	-	-
641	High speed roller bearing at D-end.	•	•	•	•	•	•	-	-	-	-
654	Provision for vibration sensors (M8x1)	•	•	•	•	•	•	-	•	•	•
795	Lubrication information plate	-	-	-	•	•	•	-	○	○	○
797	Stainless steel SPM nipples	•	•	•	•	•	•	-	•	•	•
798	Stainless steel grease nipples	-	-	-	•	•	•	-	•	•	•
Brakes											
638	Standard spring brake.	•	•	•	•	•	•	•	-	-	-
639	Improved torque spring brake.	•	•	•	•	•	•	-	-	-	-
Branch standard designs											
178	Stainless steel / acid proof bolts.	•	•	•	•	•	•	-	•	•	•
204	Jacking bolts for foot mounted motors.	-	-	-	-	-	-	-	•	•	•
209	Non-standard voltage or frequency, (special winding).	•	•	•	•	•	•	•	•	•	•
425	Corrosion protected stator and rotor core.	•	•	•	•	•	•	•	•	•	•
Cooling system											
642	Radial fan mounted on RHS (seen from D-end).	-	-	-	-	-	-	•	•	•	•
643	Radial fan mounted on LHS (seen from D-end).	-	-	-	-	-	-	•	•	•	•
Coupling											
035	Assembly of customer supplied coupling-half.	-	-	-	-	-	-	-	•	•	•
Documentation											
141	Binding 2D main dimension drawing.	•	•	•	•	•	•	-	•	•	•
370	Motor model drawing in 3D	•	•	•	•	•	•	•	•	•	•
374	Binding 2D motor detailed drawing	•	•	•	•	•	•	-	•	•	•
536	Photos of manufactured motors	•	•	•	•	•	•	-	•	•	•
537	Advanced data sheet	•	•	•	•	•	•	-	•	•	•
722	Rotor dimension drawing (incl. torsional stiffness).	•	•	•	•	•	•	-	•	•	•
777	Premium documentation package	•	•	•	•	•	•	-	•	•	•
Earthing Bolt											
067	External earthing bolt.	•	•	•	○	○	○	-	○	○	○
Heating elements											
450	Heating element, 100-120 V	•	•	•	•	•	•	-	•	•	•
451	Heating element, 200 - 240 V	•	•	•	•	•	•	•	•	•	•

Code/Variants	Frame size										
	80	100	132	160	180	200	225	250	280	315	355
Insulation system											
405	Special winding insulation for frequency converter supply.	•	•	•	•	•	•	•	•	•	•
Mounting arrangements											
009	IM 2001 foot/flange mounted, IEC flange, from IM 1001 (B35 from B3).	○	○	○	-	-	●	●	-	-	-
066	Modified for specified mounting position differing from IM B3 (1001), IM B5 (3001), B14 (3601), IM B35 (2001), IM B34 (2101)	●	●	●	●	●	●	●	●	●	●
305	Additional lifting lugs.	-	-	●	●	●	●	●	-	●	●
320	IM2001 foot/flat bottom flange mounted, from IM1001 (B35 flat bottom flange from B3)	○	○	○	○	○	○	○	●	-	-
Painting											
105	Paint thickness report.	●	●	●	●	●	●	●	-	●	●
111	Painting system C3,durability Medium	●	●	●	●	●	●	●	-	●	●
114	Special paint color, standard grade	●	●	●	●	●	●	●	●	●	●
168	Primer paint only.	●	●	●	●	●	●	●	-	●	●
Protection											
072	Radial seal at D-end. Not possible for 2-pole , 280 and 315 frames	●	●	●	●	●	-	-	-	-	-
783	Labyrinth sealing at D-end.	-	-	●	●	○	○	-	○	○	○
784	Gamma-seal at D-end.	●	●	●	○	○	-	-	-	-	-
Rating & instruction plates											
002	Restamping voltage, frequency and output, continuous duty.	●	●	●	●	●	●	●	●	●	●
004	Additional text on std rating plate (max 12 digits on free text line).	●	●	●	●	●	●	●	-	●	●
095	Restamping output (maintained voltage, frequency), intermittent duty.	●	●	●	●	●	●	●	-	●	●
126	Tag plate	●	●	●	●	●	●	●	-	●	●

Motors in brief

High Dynamic Performance motors, IP55 (M3ET) series

Motor size	80	100	132	160	180	200	225	250	280	315				
Stator	Material	Extruded aluminum frame					Electrical steel, steel							
	Paint colour shade	RAL 9005/ Jet black												
End-shields	Material	LPDC Aluminum					Cast iron							
	Paint colour shade	RAL 9005/ Jet black												
Feet	Integrated in end shields													
Bearings	D-end	6305- 2Z/C3	6308- 2Z/C3	6310- 2Z/C3	6312- 2Z/C3	6314- 2Z/C3	6315/ C3	6319/ C3	6322/ C3	6322/ C3				
	N-end	6305- 2Z/C3	6308- 2Z/C3	6310- 2Z/C3	6312- 2Z/C3	6314- 2Z/C3	6314/ C3VL0241	6316/ C3VL0241	6319/ C3VL0241	6316/ C3VL0241				
Axially-locked bearings	Inner bearing cover	As standard, locked ad D-end. Floating ND-end.												
Bearing seal	D-end	Gamma ring as standard					Labyrinth seal							
	N-end	Gamma ring as standard					Labyrinth seal							
Lubrication	2Z/ZZ permanently lubricated bearings					Regreasable bearings, regreasing nipples, M10x1								
Rating plate	Material	Stainless steel												
Terminal box	Frame material	Die cast aluminum					Cast iron							
	Cover material	Die cast aluminum					Cast iron							
Connections	Cover screws material	Steel 8.8, zinc electroplated												
	Cable-entries	Blind flange												
Fan cover	Terminals	3 terminals for connection with cable lugs					6 terminals for connection with cable lugs							
	Material	Steel												
Stator winding	Paint colour shade	RAL 9005/ Jet black												
	Material	Copper												
Rotor winding	Insulation	Insulation class H												
	Winding protection	3 PTC thermistors as standard 150 °C					3 PTC thermistors as standard 170 °C							
Balancing	Material	Presure die-cast aluminum												
Key ways	Half-key balancing as standard					Closed keyways								
Drain holes	Open keyways													
External earthing bolt	M6	M8	M10	M16	B3 none and B35 STD					M10x25				
Enclosure	IP 55													
Cooling method	IC416					IC06

Total product offering

Motors and generators with a complete portfolio of services

IEC motors

- Low voltage motors
- High voltage induction and synchronous motors
- Marine motors
- Motors for explosive atmospheres
- Motors for food and beverage
- Motors for variable speed drives
- Permanent magnet motors
- Synchronous reluctance motors
- Traction motors

NEMA motors

- Low voltage motors
- High voltage induction and synchronous motors
- Marine motors
- Motors for explosive atmospheres
- Motors for variable speed drives
- Permanent magnet motors
- Servomotors
- Washdown motors

Generators

- Generators for wind turbines
- Generators for diesel and gas engine power plants
- Generators for steam and gas turbine power plants
- Generators for marine applications
- Generators for industrial applications
- Generators for traction applications
- Synchronous condensers for reactive power compensation

Life cycle services

ABB's portfolio of drives

Optimal solution for you

Being able to rely on the continuous high performance and efficiency of your operations is something you want to take for granted. ABB variable-frequency drives are made with all this in mind, established upon more than 40 years of experience and backed by a broad range of life cycle services.

ABB drives help you to optimize your processes and systems with state-of-the-art motor control technology, resulting in increased energy efficiency, better product quality, and reduced operating costs with higher output, less downtime, and reduced need for maintenance. All ABB drives are designed for easy selection, ordering, installation and use, and they offer integrated safety features, giving you more time to focus on what matters for you and your business.

Our portfolio offers low-voltage AC and DC drives, medium-voltage AC drives, and motion control drives spanning the fractional-kilowatt to multi-megawatt power level. There is a drive available for essentially every industry and application and for all types of motors, in environments ranging from water utility facilities to clean electrical rooms, and to harsh coal mines and windy offshore platforms to food and beverage production. This wide product range allows you to select the best-fitting drive solution, providing maximum reliability and efficiency for every need.
