

Constructing and specifying Easier than ever before

Stop time-consuming and problematic import trials from other CAD formats into your CAD system. You have the possibility to download your individual 3D CAD files from the PMA Internet website.

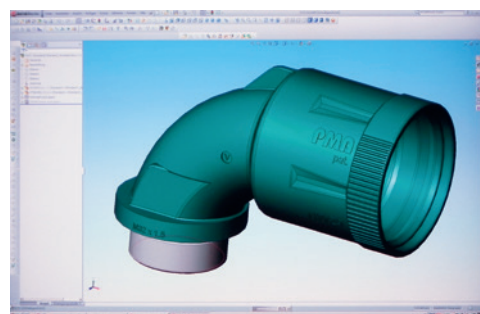

PMA offers this service together with Partsolutions. You can simply find the PMA parametric product files under www.pma.ch/cad and directly integrate them with only a few steps into your construction. All current 3D and 2D programmes will be supported in the original format – independent of the used operating system.

Benefit from the advantages:

- Simplified planning, construction and specification
- Cost savings during the planning period
- Direct import into your CAD system without conversion
- Support in over 40 CAD file formats
- Always up to date files
- Optimized size of files
- Service free of charge

For detailed information please contact your nearest PMA distribution partner or PMA Switzerland. Additional information can also be obtained on our Website.

PMA uploads the CAD construction into the Internet database

Files are ready for download under www.pma.ch/cad

Files can be loaded in all current 3D and 2D programmes.

Direct and free of charge access to our
CAD files can be obtained from:
<http://pma.partcommunity.com/3d-cad-models/>
