

# ABB Emax 2 with Ekip Link

Total reliability  
for dynamic positioning

**Close ring system** is the new way to build a vessel's electrical system.

This structure is changing the overall concept of reliability in the vessel.

UP TO **20%** | more operating time for the equipment

UP TO **3,7%** | of fuel saved

CLOSED RING

OPERATION TIME

FUEL SAVED

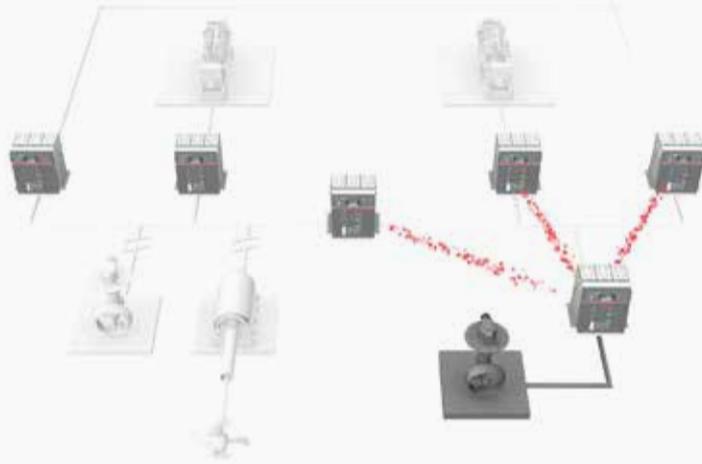

## Ekip Link plus Emax 2

forms the basis of a unique solution for marine vessels  
Logic-zone selectivity boosts the efficiency, flexibility and reliability to the next level.

EFFICIENCY

FLEXIBILITY

RELIABILITY

## Efficiency

Time efficiency

UP TO **60%** | faster fitting and commissioning

cost effective solution compared to traditional wired cable selectivity

Space efficiency

UP TO **30%** | of space saved

switchgear is smaller in size so use of space can be optimized

## Flexibility

**100%** | Applicable in every low-voltage scenario

Solution suitable for all power system configurations

## Reliability

ABB proprietary bus

# ABB Ekip Link

ABB Ekip link system with Emax 2 bring service continuity to a new level for the ships of the future.
