

Smarter Home

For homes of the future, today

Worldwide, 12% of those who have access to the internet use smart home technology, and its popularity is increasing, with another 33% 'very likely' to adopt smart home solutions in the near future. ABB's Smarter Home offering brings many benefits...

44%

of consumers see convenience as a key smarter home benefit.

Create the perfect mood for cooking, dining or relaxing at the touch of a button.

At ABB, we're creating homes of the future, today, made possible by our cloud infrastructure, known as ABB Ability™. Simplicity and adaptability are central to our Smarter Home offering – many household applications can be easily linked together through our open standard technology. At ABB, we're working to save energy and ensure safety and comfort in homes all over the world.
