# Overhead

In overhead distribution, quality and continuity of service are critical. ABB provides the connectors and apparatus you need to keep the power on — and restore service rapidly when faults occur.

1 Fisher Pierce® clamp-type faulted circuit indicator

2 Elastimold™ vacuum reclosers

**3** Blackburn Storm-Safe® service entrance disconnect

4 Blackburn® parallel groove clamp

5 Blackburn overhead transformer eyebolt connector

6 Blackburn service entrance splice

**7** Blackburn ATS Autoset® automatic splice

8 Blackburn full- and semi-tension compression splices

9 Joslyn Hi-Voltage® VSV capacitor switches

10 Blackburn HLC hot-line clamp

11 Blackburn PowerTap™ stirrup

12 Fisher Pierce faulted circuit indicator

13 Blackburn H-tap connector

14 Hi-Tech® current-limiting fuse and Valiant fuse for fire mitigation

15 Fisher Pierce 5400 series capacitor controller

16 Blackburn compression pin terminal

17 Blackburn ATD-CB clevis bracket
