

Substation

Improve reliability and efficiency with ABB's extensive portfolio of substation solutions — encompassing weldment and bolted connections up to 500 kV, current-limiting fuses, capacitor and reactor switches and more.

1 Joslyn Hi-Voltage® VBM capacitor switches

2 Hi-Tech® current-limiting substation fuse

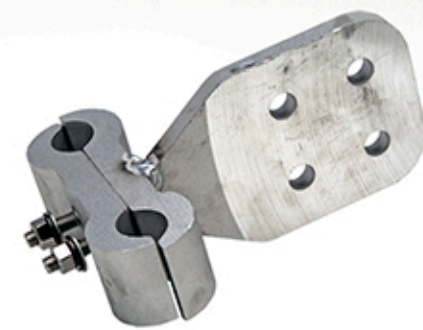

3 Homac® bolted elbow, pipe to pipe

4 Homac corona bell, drive fit

5 Homac EHV bolted bus support, two cables to insulator

6 Homac terminal, two cables to flat

7 Homac bolted terminal, pipe to flat

8 Elastimold® 69 kV transmission cable termination

9 Homac aluminum compression terminal

10 Homac bolted tee, cable to cable

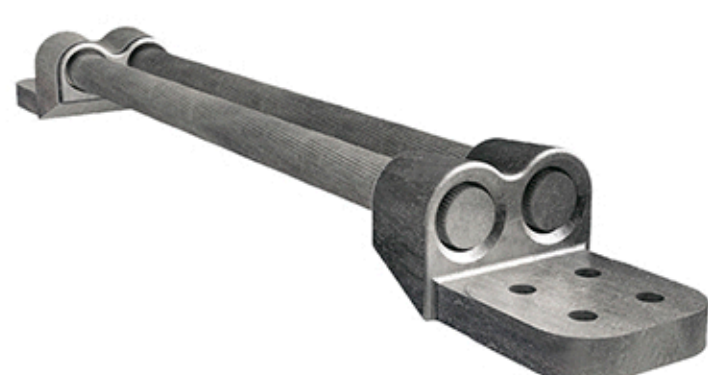

11 Homac bolted ground connector, two or three cables, parallel to pipe or rod

12 Homac U-bolt parallel clamp, cable to cable

13 Homac bolted bus support, cable to insulator

14 Homac welded cable jumper, flat to flat

15 Elastimold™ vacuum reclosers

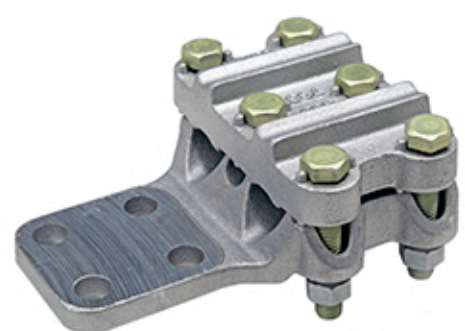

16 Blackburn flexible braid

17 Homac bolted cable spacer, two cables

18 Homac bolted stud connector

19 Homac bolted terminal, two cables to flat

20 Elastimold® Ranger2™ cold-shrink termination

21 Homac bolted expansion bus support, pipe to insulator

22 Homac hook-on bus support, weld or slide, pipe to insulator

23 Homac bolted terminal, pipe to center-formed flat
