
New Steel City® commercial hub from ABB to meet industry standards

Commercial Hub

Commercial Grounding Hub

Steel City® products symbolize the highest quality standards in manufacturing and innovative design, with one of the most complete offerings. ABB is pleased to announce that it has now added an important product to its significant Steel City offering- the commercial hub. The new hub is a dependable cULus listed economical commercial grade solution that meets industry requirements. The die-cast zinc hub with insulated throat and sealing ring is the perfect choice to terminate conduits in an enclosure or box, providing superior sealing for exceptional watertight performance. New Steel City® commercial hub by ABB is available in standard and grounding version to give customers maximum flexibility in planning of applications in commercial, light industrial and residential construction. The new Steel City® commercial hub offering along with the established T&B Hubs will allow ABB to offer a complete solution that covers both end of application spectrum from heavy industrial to commercial applications.
