
Water management for 500 textile mills in Surat

Automation of water management to measure water consumption real-time

Using the collected data and the computer-generated reports, the municipality will study pattern of consumption and areas of improvement for better water management.

Surat, Gujarat, India

Water management for 500 textile mills in Surat

Automation of water management to measure water consumption real-time

Customer : Municipal Corporation at Surat

Location : Surat, Gujarat, India

Industry : Water and wastewater

Customer need

- **Digital solution** to collect water consumption data and remove manual data collection from the water-intensive textile mills
- Better water consumption **monitoring and prediction** for higher uptime and planning

ABB's solution

- **Connected services:** The ABB flowmeters collect data and send it using GSM network to the control center in the real-time
- **Analytics:** The collected data also provides computer-generated reports to study pattern of consumption and areas of improvement for better water management
