
BUILDING AND HOME AUTOMATION SOLUTIONS, 09/04/2020

Release Note

Busch-ControlTouch®

Product name	Busch-ControlTouch® (View Website)
Product type	6136/APP-500
Order code	2CKA006136A0202
Current version	Firmware 1.3.2
Languages	EN, DE, NL, FR, IT, ES, RU, PL, SE, NO, FI, CN

ATTENTION:

All installed devices with a firmware older than version 1.3.0 must be updated, otherwise these devices will no longer work properly from May 2020 on. Claims arising from defects or damage due to a software version that is not up to date cannot be asserted.

How to check and update the current firmware version of your device:

- The customer should download the latest version of the iOS or Android App (Version 1.3.2)
- The customer should be in the same network as the ControlTouch
- When the app is opened, it automatically determines which firmware is installed on the ControlTouch
- If the installed firmware version is older than 1.3.0 you can update it directly out of the App (without interference of an installer)
