

Upgrade your mission critical application with MNS®-Up

Just imagine how everyone is depending more and more on data, computing power and connectivity – we all rely on a data center somewhere. Data centers require new power supply architectures that can scale in real-time with business growth. That's what MNS-Up is designed to deliver.

Why are data centers so important?

In 2019 global internet traffic surpassed **40 zettabyte**. That's 40 billion terabytes or 12.000 billion hours of good quality video.

over **400%** expected growth of data center traffic by **2025**

Why is energy efficiency and availability so important?

A large data center has the capacity to use as much electricity as a **small town in the United States**.

Outages can cost up to **\$1m** per hour

What are the benefits of MNS-Up?

10%

Cost savings in the electrical infrastructure due to elimination of input/output switchgear, bypass and cable/bus duct connections.

20%

Faster ready for operation

30%

Footprint savings
