

Predictive maintenance

Customer
Sugar producer
Middle East

Customer needs
Monitor condition of main MV primary switchgear, predicting failures and optimizing maintenance activities

Digital offering
MyRemoteCare asset health for electrical system

“

With MyRemoteCare, we can easily have the overview of assets health status, planning maintenance only when required, and ensure process continuity. Remote monitoring of asset condition increases safety.

”

- ✓ MyRemoteCare multi-site dashboard offers a clear asset health overview and scheduled service activities.
- ✓ A field service can remotely see behavior details of assets, and service prescriptions to better plan any field activities.
