“

The high level of collaboration between ABB and AGRANA is a practical demonstration of our commitment to zero distance to the customer.

”

- ✓ ABB had an excellent track-record at the site's existing wheat starch plant, opened in 2013.
- ✓ The ABB equipment is deployed across all the process steps in the plant and is used for a wide variety of applications including pumps, fans, conveyors and compressors.
- ✓ The MNS LV switchgear also has a fully modular, withdrawable design that provides high levels of safety, availability and reliability for the plant's power distribution network.
