

Increased productivity

Customer

Naqua, largest shrimp farm in Saudi Arabia

Customer needs

Customer wanted to grant a reliable power supply in a harsh environment and in a large distributed area

Solution offering

>150 CSS fully type tested

[More information](#)

“

With an integrated solution approach we have been able to guarantee the full electrification for the scope and the continuous supply of energy in a harsh environment.

”

- ✓ ABB's Compact Secondary Substation (CSS) is the ideal solution for fish farms, greenhouses and even some industries because of the distributed loads
- ✓ It will guarantee reliable power supply with distributed low voltage (LV) loads, due to its full certification according to international standard IEC 622271-202
- ✓ Cross-selling example
