## 1. First steps in MyLearning

**ABB MyLearning** is global Learning Management System developed for ABB employees & customers utility. The tool replaced old Training Partner along with similar systems that had been used locally by some of ABB divisions before.

MyLearning helps ABB to deliver a superior LMS experience that enables adoption, speeds compliance and significantly improves training effectiveness. The platform supports knowledge transferring process, organizing & scheduling live or F2F training sessions and also tracking & verifying Learner's progress in training material. In addition to the full range of standard LMS functionalities - as a cloud solution, **MyLearning offers online & offline access for mobile devices**.

Find out more about MyLearning here (Internals only). Check out our mobile app available for Android & iOS devices.

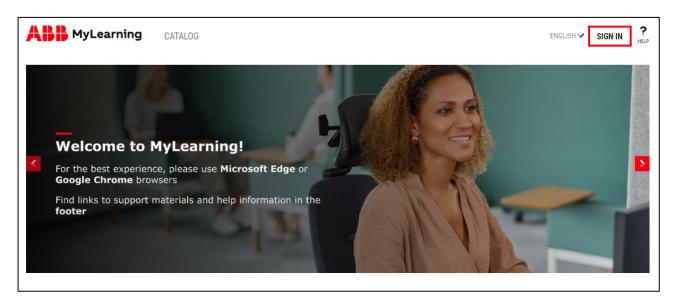

In this document you will find all necessary information that will guide you through MyLearning system. Each chapter focuses on sections that are available in the system and presents what actions you can take in each of them (e.g. join Virtual Class or cancel your training). At the end of the document, you can also find a chapter with **support information** as well as **links to other support documents**.

## 1.3. Roles in MyLearning

1. Learner is the main role in MyLearning assigned to every signed in User by default (other roles might need to be requested via <u>MyServices</u>).

Learners belong to different Learner Groups basing on account attributes. The Catalog visibility in MyLearning depends on access settings defined by Administrators for each training. It means that every single Learner's Catalog view is individual.

2. Instructors in MyLearning are responsible for leading Classrooms (ILT) / Virtual Classes (VILT) and passing their knowledge to other attendees of training. Instructor type of access has to be requested via <u>MyServices</u>.

Instructor can become a Host or Presenter of specific Class. They are responsible for leading the session.

3. Managers in MyLearning are responsible for verifying & assigning training for their subordinates.

In ABB structures, this role is granted automatically basing on HR feed data. If User would like to manage others users' enrollments (e.g. ABB customers or partners), Virtual Manager role has to be requested via <u>MyServices</u>.

4. Administrators are responsible for uploading and maintaining available trainings in MyLearning.

As content owners, they are the first instance to contact for Users who are experiencing any issues with specific training.

## 7. Support for Internal and External Users

## 7.1. Before reaching out to Support (troubleshooting)

If you experience any technical issues when completing a training in MyLearning, please try to take the following actions before raising a ticket:

#### • Open the training in a different browser

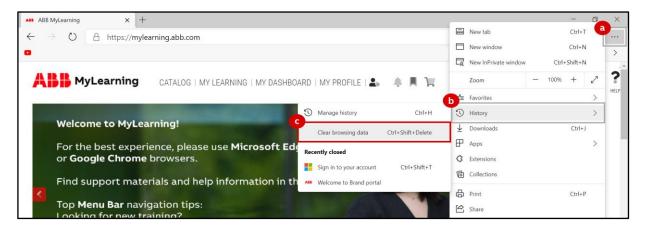

We highly recommend to use Chromium engine-based browsers for the best experience (**Google Chrome** and **Microsoft Edge**). Internet Explorer does not support all the content formats that might be attached to certain Courses and therefore not display the content properly. Additionally, this browser will no longer be supported by Microsoft with the beginning of 2021.

#### Clear cookies and cache files

If the training material is not displaying properly in the Content Player or the progress of your training has not been saved, we recommend clearing browser cookies and cache files **and opening the training on a new page**. Find out how to clear Cookies and Cache files in Microsoft Edge and Google Chrome below:

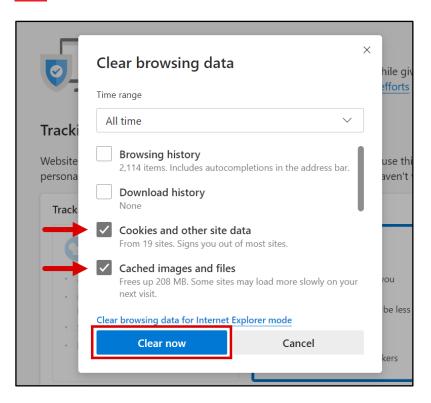

## **Microsoft Edge**

Close the browser window with MyLearning. Click on the Settings button (a) > History (b) > Clear Browsing Data (c).

2. In the pop-up window, tick 'Cookies and other site data' and 'Cached images and files'. Next, click 'Clear now'.

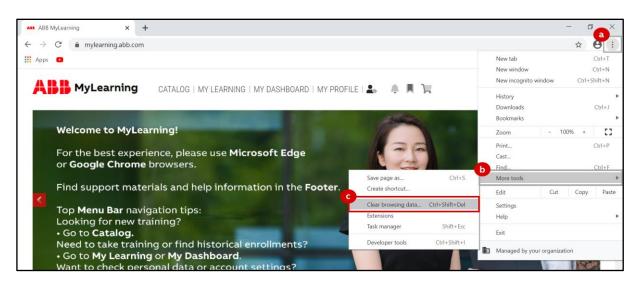

**3.** Open <u>MyLearning</u> in a new window.

## **Google Chrome**

 Close the browser window with MyLearning. Click on the Settings button (a) > More Tools (b) > Clear Browsing Data (c).

5. In the pop-up window, tick 'Cookies and other site data' and 'Cached images and files'. Next, click 'Clear now'.

- 6. Open <u>MyLearning</u> in a new window.
- Open your training in a InPrivate/Incognito window

To avoid clearing cookies and cache files history from your browser you can open the training in **a private window**. Find out how to do that in Microsoft Edge and Google Chrome below:

## Microsoft Edge

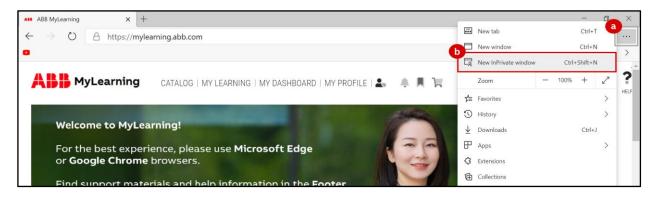

7. Click on the Settings button (a) > New incognito window (b).

## **Google Chrome**

8. Click on the Settings button (a) > New InPrivate window (b).

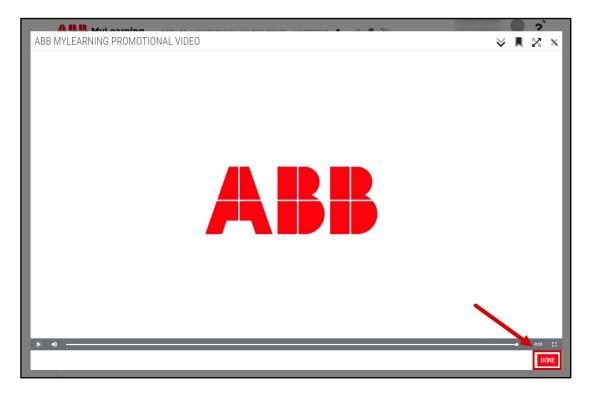

#### • Make sure you have completed the whole training

In order for the training to be marked as 'completed' in the system, it is required to finish all the necessary content in the training. Sometimes that includes e.g. taking additional steps after taking the quiz or a special button at the end that is part of the training material. Some content based trainings are also recommended to be **completed in one sitting**, as certain content formats might not be able to keep track of the training progress.

#### • Make sure you've clicked 'Done' when leaving the Content Player

To save your progress, click **'Done'** on the bottom of the Content Player, instead of the cross icon. Refreshing the page, or closing the browser window might also result in loss of progress.
