

BUSINESS AREA: ELECTRIFICATION

ABB Installation Products

Facts & Figures

ABB's Installation Products division designs and manufactures products used to manage the connection, protection and distribution of electrical power in industrial, construction, transportation and utility applications globally. With more than 200,000 products under 38 premium brand names, including Thomas & Betts, ABB Installation Products solutions are found wherever electricity is used. Trusted for over 125 years, mass manufactured and custom made-to-order products, as well as integrated solutions deliver safety and quality in the most demanding environments on earth and in space. The team is advancing innovation to meet the needs and address the sustainability challenges of tomorrow. The ABB Installation Products division operates in more than 20 countries.

Revenues

\$1,750-2,250 million

Market position

No. 1-2 overall
No. 1 North America

Key market drivers and trends

- **Infrastructure resiliency:** updates and construction to enhance reliability, efficiency and safety of critical electrical, transportation and utility systems.
- **Energy management:** shifts toward new technology and cleaner energy sources require solutions to optimize existing equipment and expand future capacity.
- **Transformation:** adoption of evolving industry practices, standards and risk mitigation approaches across commercial, industrial and residential sectors.
