

BUSINESS AREA: MOTION

ABB IEC Low Voltage Motors

Facts & Figures

ABB's IEC Low Voltage Motors Division provides an extensive range of low voltage motors fulfilling the global market needs. Our approach to product innovation is defined as consistently pushing the limits of energy efficiency.

This involves delivering superior solutions to our customers, utilizing less energy, reducing emissions, and enhancing value in a sustainable manner for the planet.

Our standard and tailored offerings cater to various industries and applications, even those in the most challenging environments.

ABB's IEC Low Voltage Motors Division operates in more than 50 countries.

Revenues

\$750–1,250 million

Market position

No. 2 overall

Key market drivers and trends

- **Energy efficiency and Sustainability:** Increasing commitment to sustainability and decarbonization. Emphasizing energy efficiency with a focus on the total cost of ownership in response to the rising energy costs while reducing emissions.
- **Digitalization:** Industry 4.0, Artificial Intelligence, and digitalization play pivotal roles, fostering efficiency and cost benefits. Support additional intelligence in motors via connectivity and predictive maintenance capability.
- **Electrification:** Electrification of the industry stands out as a key driver, shaping the demand for innovative and energy efficient solutions.
