

BUSINESS AREA: MOTION

# ABB Large Motors and Generators

## Facts & Figures

ABB's Large Motors and Generators division offers a comprehensive product portfolio of large AC motors and generators. From general purpose to highly customized designs, synchronous motors and high voltage induction motors provide high efficiency, reliability and availability across all major industries and applications, including some in the toughest and most demanding environments. The division also has a long track record of designing and building generators for wide range of industries, including power generation, marine, oil and gas, mining, and data centers.

### Revenues

\$750–1,250 million

### Market position

No. 2 overall

### Key market drivers and trends

- **Efficiency and legislation:** Adoption of high-efficiency motor systems would cut global electricity consumption by up to 10%
- **Energy transition:** Boosting power grid stability and resilience with synchronous condenser technology
- **Digitalization:** along the entire value chain – from online configuration to service
