

Limitamp MV MCC – Grounded Isolation Switch

New Grounding Feature – Standard for all 400A isolation switches

Overview

– Why was this feature added?

- Customers were asking for a second level of safety for isolation switches, to help ensure the switch blades are solidly grounded in the open position.

– What is included in the offering?

- Includes both Arc-Res and non-Arc-Res equipment, for all section widths: 26", 34", 36" or 40". The barriers around the switch blades and grounding parts are basically the same in all section widths. The length of the shaft changes for different constructions.

– What ratings are included?

- Applies to both 5 kV and 7.2 kV applications

Under development and coming soon! 800A Grounded Isolation Switch
