ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Next Generation Switching

Combi Switch Actuators (Market launch Q4/2019)

- The 9 combi devices are combining two applications: switching and shading. The products are ideally made for residential usage to offer greatest flexibility. With innovative Keypad for manual operation

Standard Switch Actuators (Market launch Q1/2020)

- These 12 devices are building the standard when it comes to switching applications for commercial buildings. During the development we focused on providing a cost optimized selection of products, that matches the needs of commercial projects

Professional Switch Actuators (Market Launch Q1/2020 and Q4/2020 for Switch Actuators with Energy Functions)

- The professional series includes 8 Switch Actuators made for high switching capacity. This portfolio has been developed to suit the high requirements of industry standards. Optional feature: Energy Functions

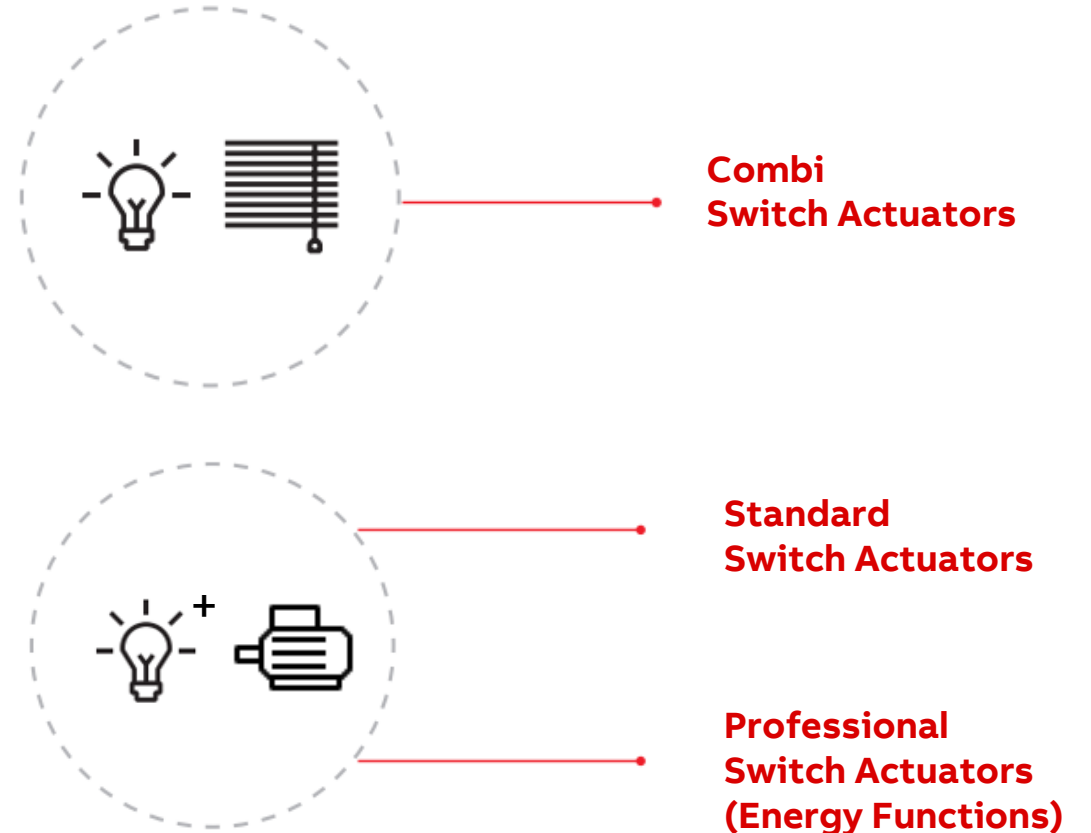

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Next Generation Switching

Combi Switch Actuators

- 8 (4MW), 16 (8MW) & 24 (12 MW) channels
- 6A, 10A & 16A - AC1 ratings
- 3 x 3 devices

Standard Switch Actuators

- 2, 4, 8 & 12 channels
- 6A, 10A & 16A - AC1 ratings
- 3 x 4 devices

Professional Switch Actuators

- 2, 4, 8 & 12 channels
- 16/20A C-load + energy function
- 2 x 4 devices

Residential

Applications

Commercial

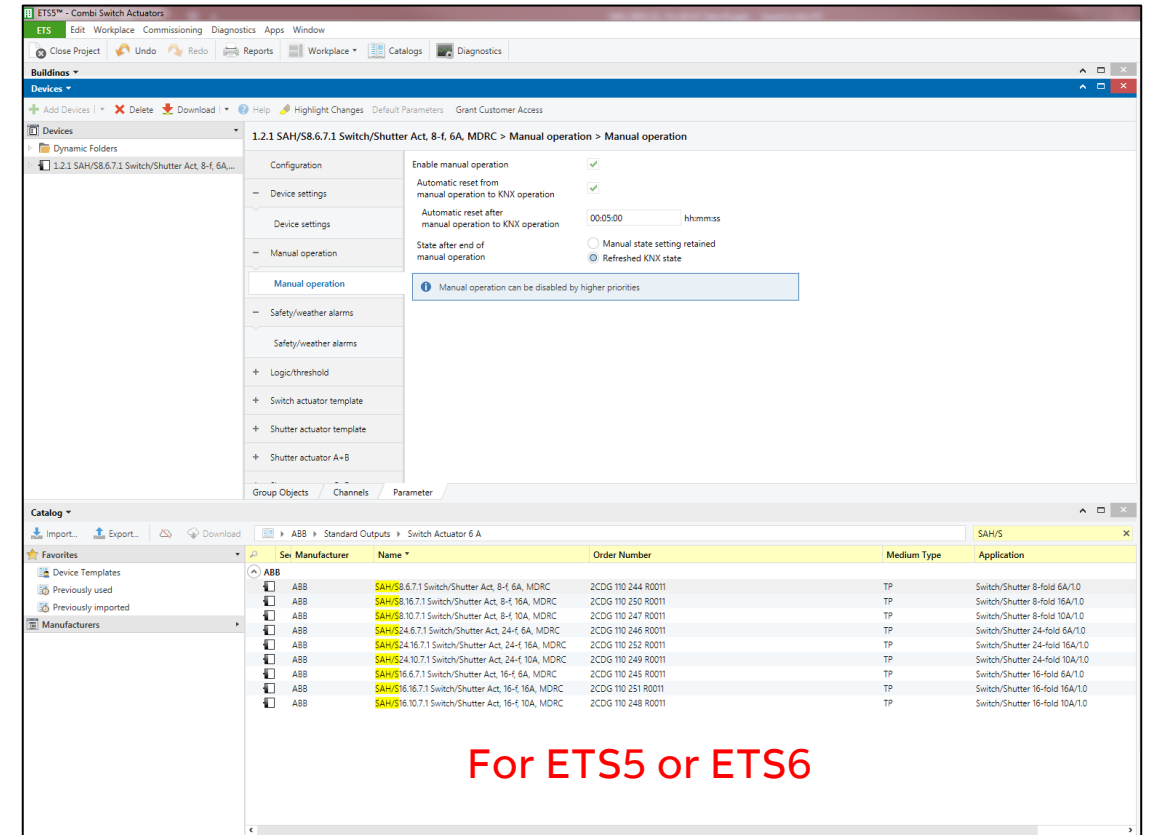

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

ETS Application

Overview ETS Application Version 1.0 with Market Launch

ETS Application with comprehensive functions but satisfying user experience

- Templates for switch- and shutter functions
- Freely programmable logic independent of the output channels (AND, OR, Exclusive OR, GATE) and threshold functions
- Combi Switch Actuators SAH/S: Full functionality of shutter outputs with two channels together (Safety/Weather alarm, automatic sun protection, scenes, blocking, forced operation), but no travel time detection
- Switch outputs with time functions (Staircase, Delay, Flashing), safety priority, forced operation, blocking, 16 scenes (1 byte)
- Central objects (switching, shutter functions, scenes)
- Colored hints simplify work
- SA/S with energy functions: Energy consumption, energy groups, load monitoring, load shedding, contact status supervision

For ETS5 or ETS6

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

ETS Application

Overview of Changes with ETS Application Version 1.1

- Load Shedding
- Logic/Threshold
- Scenes and Safety Priority
- Output names
- Wording
- Bug fixing

Catalog	Application
Manufacturer	ABB
Product	SA/S8.16.6.2 Switch Actuator, 8f, 16CS, MDRC
Application	Switch Energy Function 8-fold 16A/1.1
Device Type	\$A0E4
Program Version	1.1

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Load Shedding

Load Shedding

Target: Prevention of electrical load peaks in a building due to limited power and installation availability or significant costs

- The master, Energy Analyzer KNX QA/S or Energy Actuator SE/S, sums up all received power values and manages depending on adjusted load limit the connected loads (turn off/on) with priority (1 byte object)
- Loads not able to send any direct energy consumption values e.g. SA(H)S with application 1.1 can also be integrated into load shedding via an energy meter (Meter interface ZS/S 1.1 or KNX Energy Module EM/S 3.16.1)
- Remember: DALI Gateway Premium DG/S x.64.5.1 can be integrated in Load shedding via 1 byte object as well
- Energy Analyzer KNX QA/S can also send 1 bit telegrams per shedding stage to integrate other KNX devices

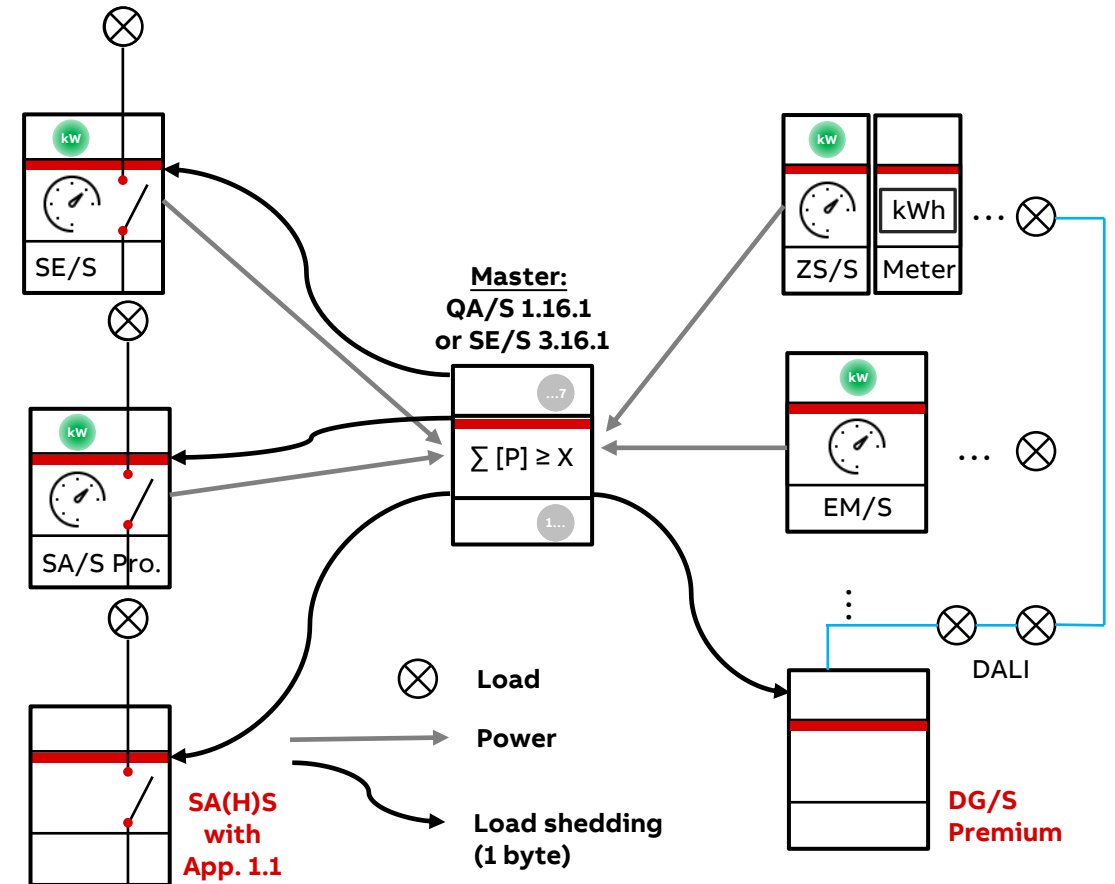

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Load Shedding

Load Shedding

Function 'Load Shedding' is now available in every Switch Actuator output of all SA(H)/S, in terms of switching on and off the outputs

- Same parameters available as in the Switch Actuators with energy functions, but no measurement of course
- Enable load shedding per channel in page 'Functions'
- All needed group objects (depending on parametrization)
 - 'Receive load shedding stage' from the master e.g. Energy Analyzer QA/S or Energy Actuator SE/S (1...8 stages, central object per device, 1 byte DPT 236.001)
 - 'Set load shedding stage' needed to change the parametrized load shedding stage
 - 'Status load shedding' sent back (0 – inactive, 1 – active)
- More Details about Load Shedding: Online Learning Session Switch Actuators - Energy Functions in Detail (Nov. 2020)
[Video](#) [Presentation](#)

The screenshot shows the ETS application interface for configuring a Switch Actuator. The top bar indicates 'Switch Actuator A' and 'Enable function Load shedding' is checked. The left sidebar shows the 'Functions' tab selected, with 'Load shedding' highlighted. The main area displays the 'Load shedding' configuration for '2.0.101 V11 SAH/S8.16.7.1 Switch/Shutter Act, 8-f, 16A, MDRC > Switch Actuator A > Load shedding'. The configuration includes a 'Parameter setting' section with 'Apply from template' and 'Individual' options. The 'Load shedding stage' is set to 1. Other settings include 'Change load shedding stage via group object' (checked), 'Overwrite load shedding stage at download' (checked), 'Switching reaction on active load shedding stage' (Off), 'Switching reaction on revoke of load shedding stage' (No reaction), 'Enable group object "Status load shedding"' (checked), and 'Send value of group object "Status load shedding"' (At change or on request).

Central - Load shedding:	Receive load shedding stage	1 byte
Channel A - Load shedding:	Set load shedding stage	1 byte
Channel A - Load shedding:	Status load shedding	1 bit

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Load Shedding

Example: QA/S and different Actuators – Assignment of Group Addresses “Load Shedding”

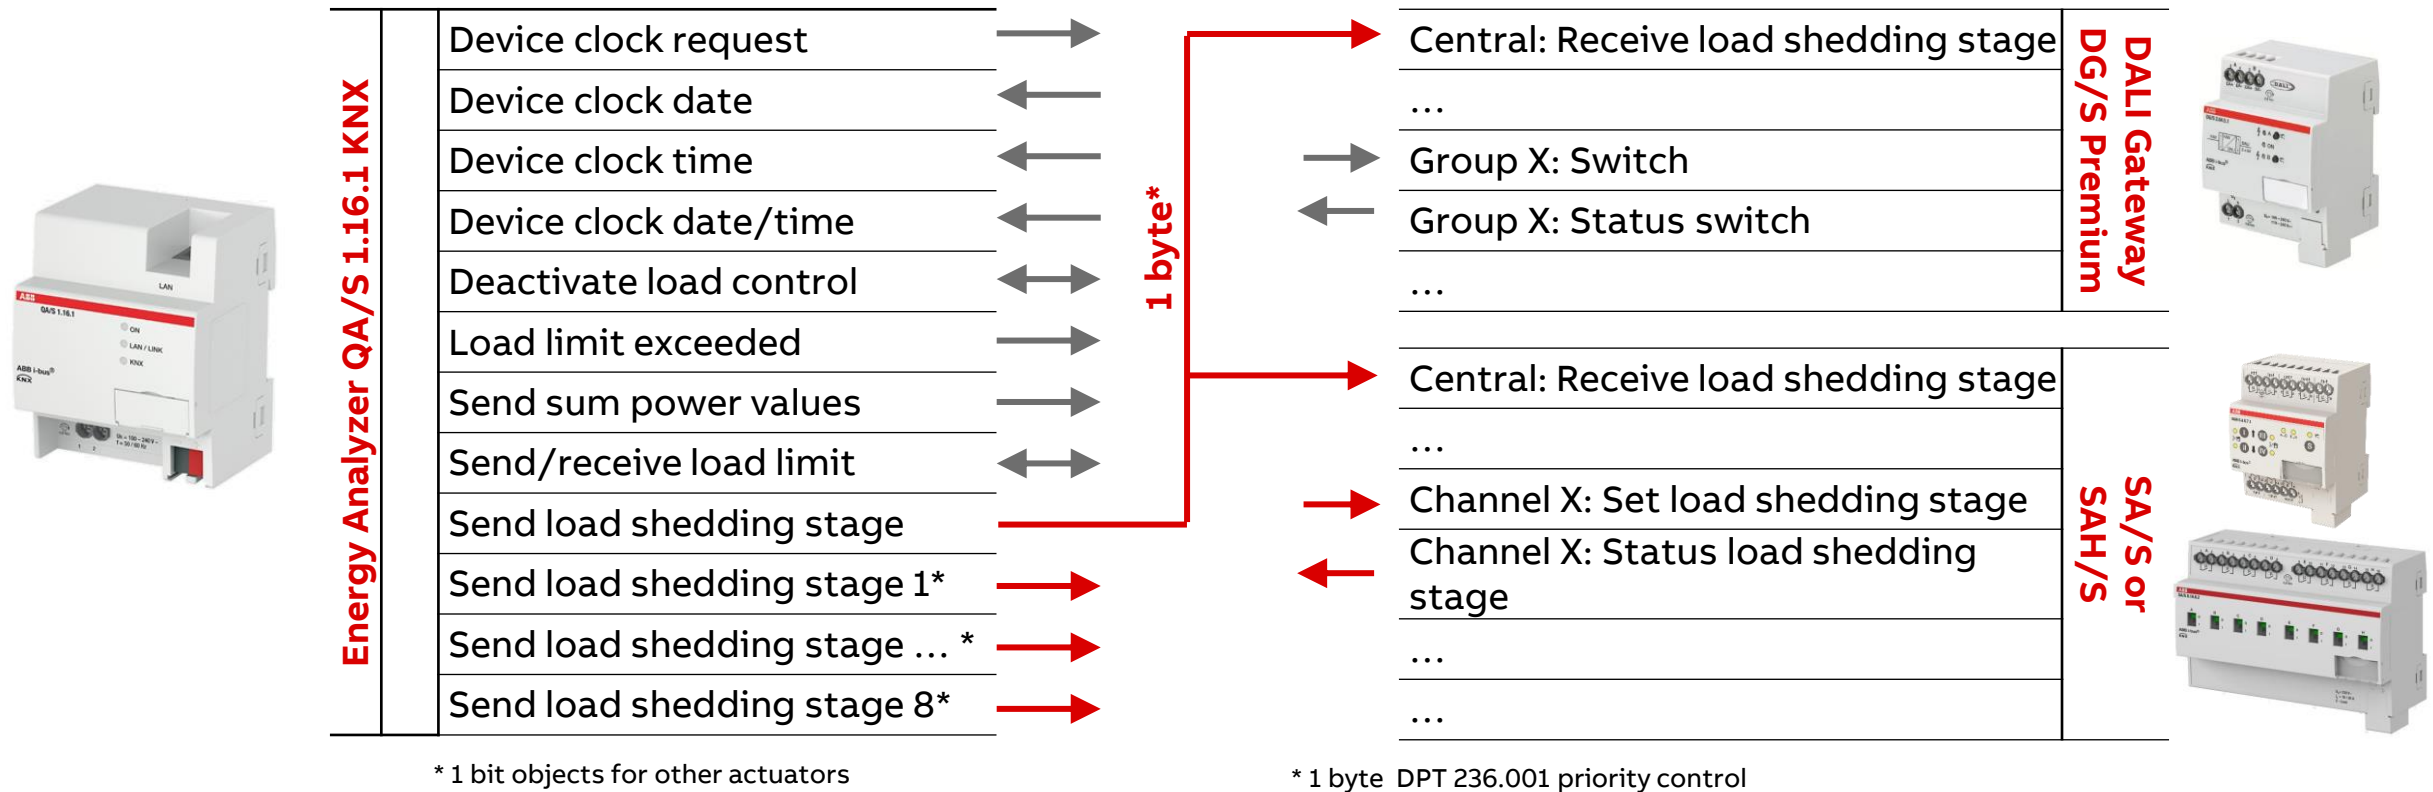

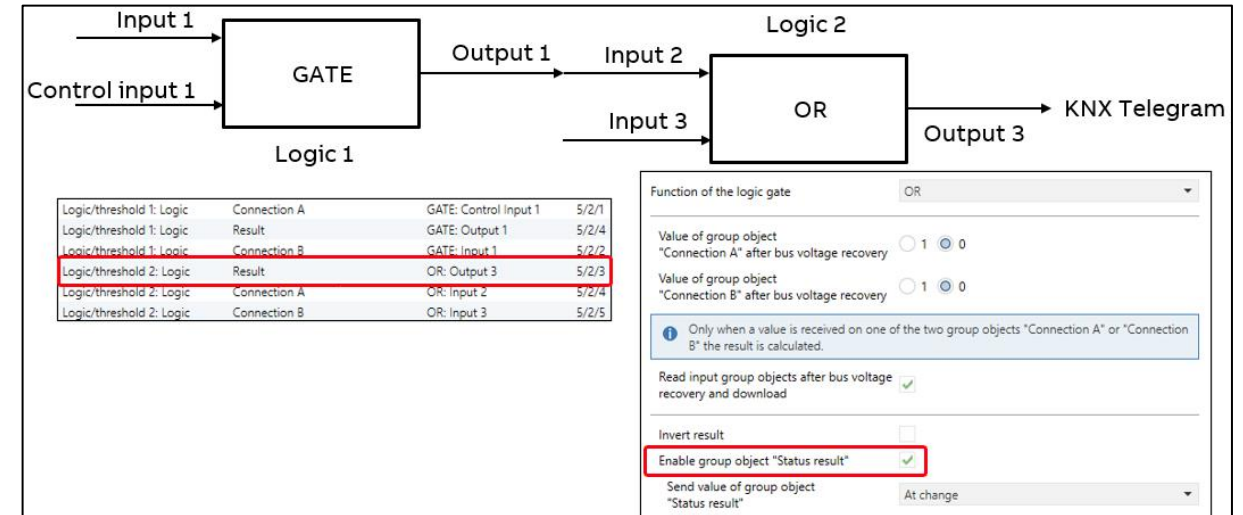

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Flexible Logic in ABB's Switch Actuators

Existing Logic

- Parametrization of logic and thresholds
 - 24 individual logic or threshold functions for each Switch Actuator
 - Functions: AND, OR, Exclusive OR, GATE and Threshold
 - Two inputs, one output
 - Result of the logic either linked to internal output or sent to KNX or both

Result
sent to
KNX

Result
linked to
internal
output

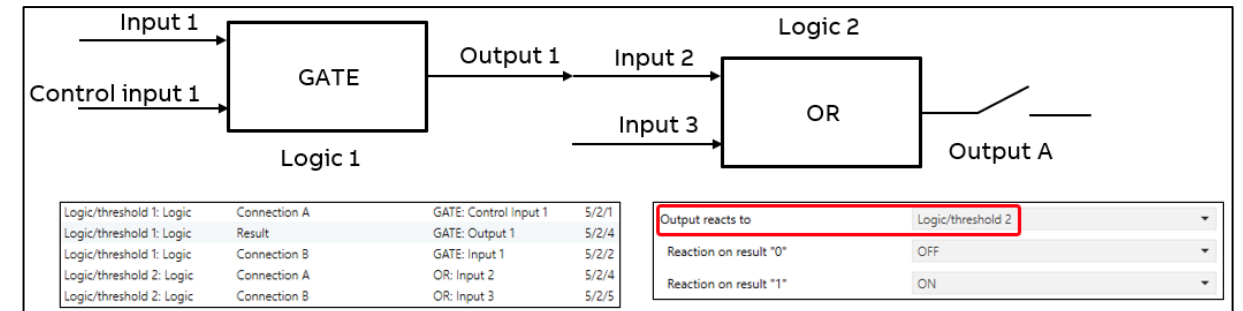

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Optimized Logic/Threshold Function

Optimized Logic

- Extension of logic with additional important function: Inverter
- Enable logic under Configuration
- Select type of logic at logic/threshold x
 - AND
 - OR
 - Exclusive OR
 - GATE
 - **1 bit Inverter**
 - Threshold

The screenshot displays two windows from the ETS Application V1.1 interface. The top window, titled '2.0.101 V11 SAH/S8.16.7.1 Switch/Shutter Act, 8-f, 16A, MDRC > Configuration', shows a list of configuration options on the left and their status on the right. The 'Enable Logic/Threshold 1-4' option is highlighted with a red rectangle and has a green checkmark. The bottom window, titled '2.0.101 V11 SAH/S8.16.7.1 Switch/Shutter Act, 8-f, 16A, MDRC > Logic/Threshold > Logic/Threshold 1', shows a list of logic/threshold functions on the left and a dropdown menu on the right. The '1 bit Inverter' option is selected in the dropdown menu, indicated by a mouse cursor and a green checkmark.

2.0.101 V11 SAH/S8.16.7.1 Switch/Shutter Act, 8-f, 16A, MDRC > Configuration		
Configuration	Enable output A + B	<input checked="" type="checkbox"/>
+ Device settings	Enable output C + D	<input checked="" type="checkbox"/>
+ Manual operation	Enable output E + F	<input checked="" type="checkbox"/>
+ Safety/weather alarms	Enable output G + H	<input checked="" type="checkbox"/>
	Enable Logic/Threshold 1-4	<input checked="" type="checkbox"/>

2.0.101 V11 SAH/S8.16.7.1 Switch/Shutter Act, 8-f, 16A, MDRC > Logic/Threshold > Logic/Threshold 1		
Configuration	Function of the logic gate	None
+ Device settings		None <input checked="" type="checkbox"/>
+ Manual operation		AND
+ Safety/weather alarms		OR
		Exclusive OR
		GATE
		1 bit Inverter
		Threshold

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Optimized Logic/Threshold Function

Optimized Logic

- Inverter allows to invert a 1 bit signal
- Often e.g. a status telegram has an inverted behavior to be processed and display
- Remember: Logic in our Switch Actuators can work independent of the outputs for any function

Inverter

Input	Output
1	0
0	1

2.0.101 V11 SAH/S8.16.7.1 Switch/Shutter Act, 8-f, 16A, MDRC > Logic/Threshold > Logic/Threshold 1

Configuration	Function of the logic gate	1 bit Inverter
+ Device settings	Read input group objects after bus voltage recovery and download <input checked="" type="checkbox"/>	
+ Manual operation	Enable group object "Status result" <input checked="" type="checkbox"/>	
+ Safety/weather alarms	Send value of group object "Status result" After receiving input value or on request	
- Logic/Threshold		
Logic/Threshold 1		

Logic/threshold 1 - Logic:	Status result	1 bit
Logic/threshold 1 - Logic:	Connection A	1 bit

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Optimized Logic/Threshold Function

Threshold Function

- Function Threshold
- Application:
 - Temperature below 2° Celsius → Frostalarm
 - Brightness level below a certain lux level → light fixtures next to exit doors 100% on
- New data point types (DPT) are available
 - A, mA, W, kW and kWh
 - typical parameters upper/lower threshold (Hysteresis) and change thresholds via group object
- Supports especially ABB's Switch Actuators with energy functions, e.g. creating a message in case of exceeding/ under-shooting a certain electrical value
 - Motor current of a fan too low → alarm
 - Energy consumption reaches x kWh, message and eventually turn off the load

2.0.101 V11 SAH/S8.16.7.1 Switch/Shutter Act, 8-f, 16A, MDRC > Logic/Threshold > Logic/Threshold 2

Configuration	Function of the logic gate	Threshold
+ Device settings	Data point type of group object "Threshold input"	Percent (DPT5.001)
+ Manual operation	<div><div></div><div>The value for the upper threshold must not, there will be a malfunction in the th</div></div>	Percent (DPT5.001) ✓
+ Safety/weather alarms		Meter pulses (DPT5.010)
		Meter pulses (DPT7.001)
– Logic/Threshold		Temperature (DPT9.001)
		Lux (DPT9.004)
Logic/Threshold 1	Upper threshold	mA (DPT 9.021)
Logic/Threshold 2	Lower threshold	A (DPT 14.019)
Logic/Threshold 3	Change thresholds via group objects	W (DPT 14.056)
	Result if upper threshold is exceeded	kW (DPT 9.024)
		Wh (DPT 13.010)
		kWh (DPT 13.013)

Data point type of group object "Threshold input" W (DPT 14.056)

The value for the upper threshold must always be above the value for the lower threshold. If not, there will be a malfunction in the threshold evaluation.

Upper threshold	4000	W
Lower threshold	100	W
Change thresholds via group objects	<input checked="" type="checkbox"/>	
Overwrite thresholds on download	<input type="checkbox"/>	

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Scenes and Safety Priority

Parametrization Scenes and Safety Priority

- Safety Priority
 - Safety priority 1, 2, 3 (1 highest, 3 lowest priority)
 - Monitoring of telegram possible with cyclical sending of safety signal (like monitoring of wind alarm with shutters)
 - Application: In case of fire alarm all lights are to be turned on with highest priority, not possible to switch off locally
- Safety Priority and Scenes
 - New way of parametrization in a table for a better overview
 - Similar to scenes and sequences in DALI Gateway Premium

+ Manual operation

- Safety/weather alarms

Safety/weather alarms

+ Logic/Threshold

+ Switch Actuator template

+ Shutter Actuator template

Safety priority for Switch Actuator operation

The reaction with safety priority active must be specified on the parameter page "Safety" for the Switch Actuator channels.

Group object	enable	Cyclical monitoring
Safety priority 1	<input checked="" type="checkbox"/>	00:01:00 hh:mm:ss
Safety priority 2	<input checked="" type="checkbox"/>	00:00:30 hh:mm:ss
Safety priority 3	<input checked="" type="checkbox"/>	00:00:00 hh:mm:ss

Cyclical monitoring: 0 = cycl. monitoring deactivated

1	<input checked="" type="checkbox"/>	1	00:00:10 hh:mm:ss	<input checked="" type="radio"/> On <input type="radio"/> Off
2	<input checked="" type="checkbox"/>	2	00:01:00 hh:mm:ss	<input type="radio"/> On <input checked="" type="radio"/> Off
3	<input type="checkbox"/>			

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Output Names

Output Names for better overview

- For each switching output an individual name can be parametrized
- Name will be adopted for all group objects of this output
- In addition visible in the headline and on the left side of the parameter page describing the output page
- Advantage
 - Better overview in ETS, easier allocation of group addresses to objects
- Please note: (Status Dec. 2021)
This feature exists for the standard and professional range of ABB's Switch Actuators right now, it is not yet implemented for Combi Switch Actuators SAH/S, but will be available soon

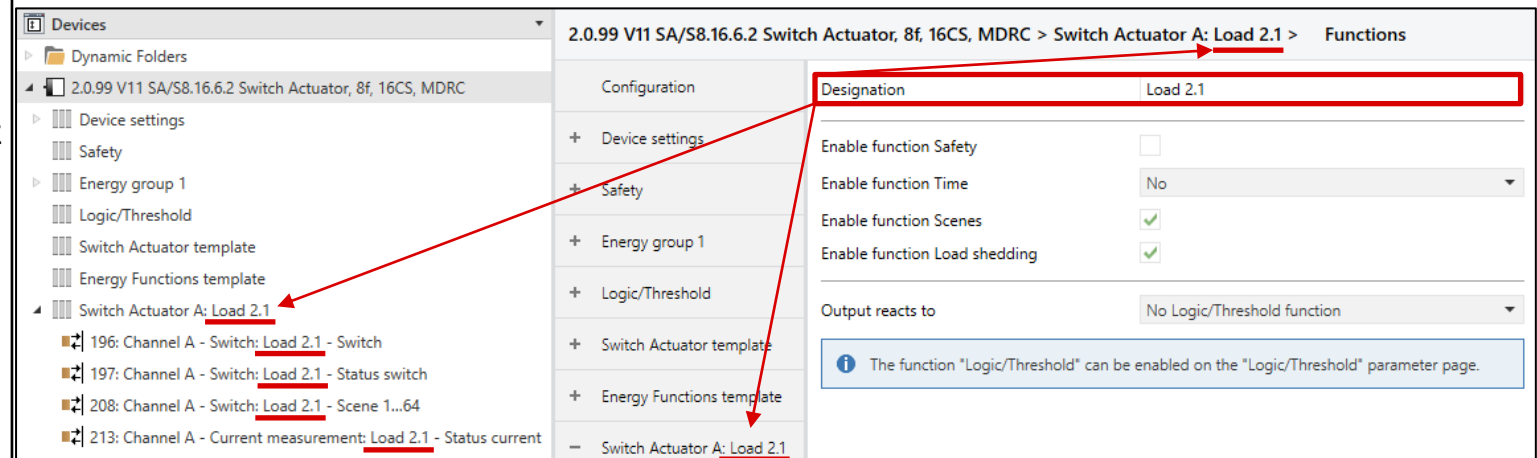

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Overview

General Information/Update

With the new ETS Application 1.1, all Switch Actuators (Combi, Standard, Professional with and without Energy Function) are unified in wording, user interface and function

- ETS Application V1.1 (available 17th December 2021)
- Firmware (available 17th December 2021)

Combi	V 0.1.7
Standard / Professional	V 0.1.4
Professional with Energy Function	V 0.1.2

- Use ETS App Firmware update V2.0
- It replaces the App ABB KNX Bus Update
- To update the application for actuators in a project with existing parametrization and group address assignment
 - Use ETS App Update Copy Convert (new version 1.0.160.0)

Product manual and technical data sheets are internationalized
DE / EN / FR / ES / IT / RU / PL / NL (available 20th December 2021)

Catalog	Application
Manufacturer	ABB
Product	SA/S8.16.6.2 Switch Actuator, 8f, 16CS, MDRC
Application	Switch Energy Function 8-fold 16A/1.1
Device Type	\$A0E4
Program Version	1.1

Apps				10 active / 18 installed

		ABB Update Copy Convert		ABB	1.0.160.0

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Updates

Firmware update

With the new App ABB Firmware update V2.0 (replacing App Bus update) it is easy to carry out the firmware update for ABB i-bus® KNX components

- Select App Firmware update 2.0 from drop down menu Apps
- Apps are available under knx.org in the shop ETS Apps
- Select Device type, e.g. 'All' or here SAH/S
 - All related products in the project are shown
 - Automatic search for new firmware version in the database of our server is started and possible update is shown
 - No need for downloading any firmware files to the PC
- Similar to the replaced Bus update App:
 - Options: e.g. force update to an older version
 - Import: Import of existing firmware files (normally no need)
 - Reload: Update status, search again for new version
- After few minutes update succeeded

Updates

Application update

With the App ABB Update Copy Convert it is easily possible to update an ABB products in an existing project with existing parametrization to the actual application version

- Insert the same product (SA(H)S) with version 1.1. into your project
- Select App ABB Update Copy Convert from drop down menu Apps
- Select the device (SAH/S or SA/S) with old application 1.0 in your project, device is visible in the App window
- Click on ‘Update’
- Window ‘Update Devices’ shows the device to be updated to the new version
- Start update and after short time process is completed
- More Details about this App: Webinar “Various Software Tools for KNX” (Feb. 2019) [Video](#) [Presentation](#)

Export / Import

Export a device
configuration and import
it on a compatible device

Export functionality

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

ETS App Update Copy Convert - Export and Import

Export and Import – Example

In his next project system integrator Marco J. realized the configuration for the Valve Drive Controller VC/S 4.2.1 is the same as the one from a previous project.

He exports the configuration from the source project and import it in the new one

The group addresses were not copied

Efficient work 24/7

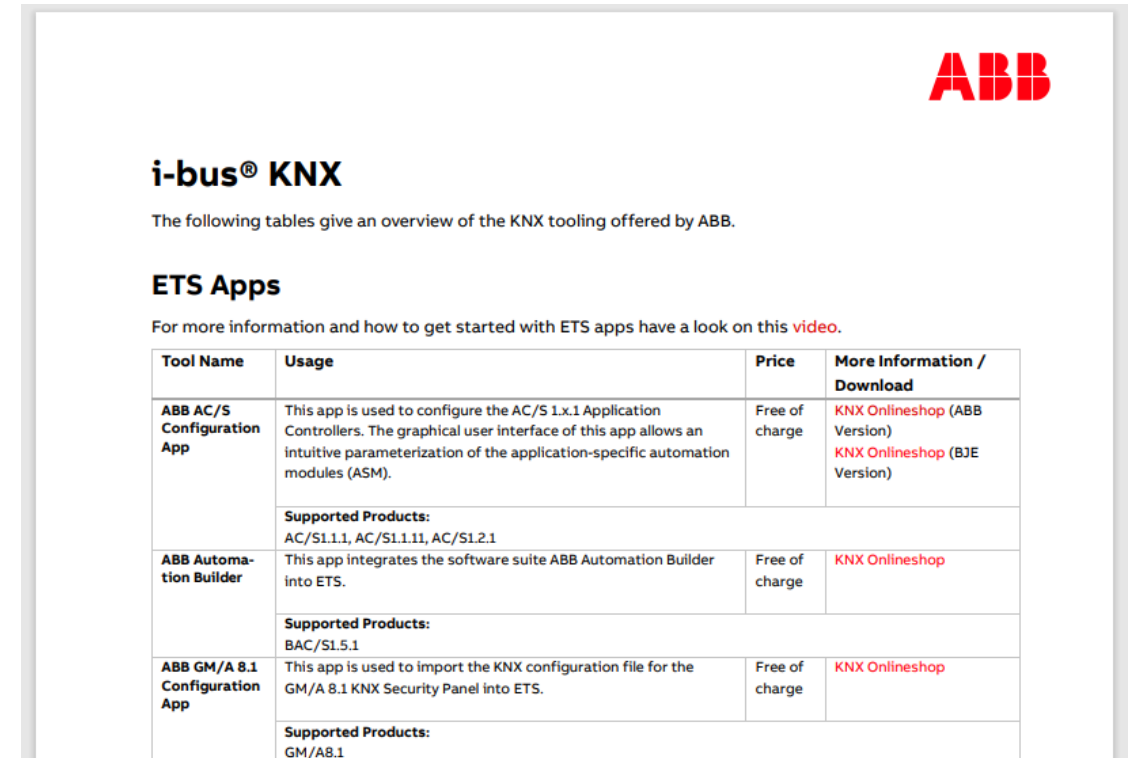

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Overview

Engineering Guide Tooling Overview

In the Tooling Overview are collected all Apps, tools and online services offered for the Building & Home Automation Solutions portfolio

- ETS Apps: (e.g. ABB Firmware update)
used to install and configure a KNX system
These apps just need to be downloaded from the ETS Shop, installed in the ETS
- Mobile Apps: (e.g. ControlTouch App)
Applications mainly used on smartphones or tablets and some also on laptops. Used to configure or control devices
- Service Tools: (e.g. ABB i-bus® Tool)
Support during planning, commissioning and service of the installations
- Configurators: (e.g. ABB-tacteo configurator)
Possible to adapt the product functions or specifications to your individual needs

Tool Name	Usage	Price	More Information / Download
ABB AC/S Configuration App	This app is used to configure the AC/S 1.x.1 Application Controllers. The graphical user interface of this app allows an intuitive parameterization of the application-specific automation modules (ASM).	Free of charge	KNX Onlineshop (ABB Version) KNX Onlineshop (BJE Version)
	Supported Products: AC/S1.1.1, AC/S1.1.11, AC/S1.2.1		
ABB Automation Builder	This app integrates the software suite ABB Automation Builder into ETS.	Free of charge	KNX Onlineshop
	Supported Products: BAC/S1.5.1		
ABB GM/A 8.1 Configuration App	This app is used to import the KNX configuration file for the GM/A 8.1 KNX Security Panel into ETS.	Free of charge	KNX Onlineshop
	Supported Products: GM/A8.1		

[LINK Tooling Overview](#)

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

BCU key

BCU key to lock KNX devices

In the ETS (Overview/Projects) a BCU (Bus Coupler Unit) key can be set for a project

Without this key (4 byte hex number) it can be a problem to access in a project a device which supports this feature, no download of application could be feasible

Advantage: Any unauthorized (re)programming without key or original ETS project is not possible

Risk: In case of lost key or lost original ETS project the device can be used only with the actual programming and commissioning status, any changes are impossible

No other chance, except replacing with a new product!

Switch Actuators SA/S and SAH/S support BCU key!

SAH/S24.10.7.1

General Information

Extended Product Type:	SAH/S24.10.7.1
Product ID:	2CDG110249R0011
EAN:	4016779066839
Catalog Description:	SAH/S24.10.7.1 Switch/Shutter Actuator, 24-fold, 10 A, MDRC
Long Description:	The compact 10 A combi switch actuator has 24 independent switching relays (no electromechanically interlocking). The outputs can be used individually via ABB i-bus® KNX for switching electrical loads or in pairs for controlling 230 V AC roller shutter or blind drives. The device features a manual operation, which can also be disabled. Via the manual operation the outputs can be operated manually and the switching or driving status is displayed. The device is powered by KNX and requires no additional power supply.

Software Repository

- Excel list in German and English
- Link to general product information
- Search for a KNX product and the corresponding software (firmware, ETS application) will be displayed
- Current firmware of Welcome IP and free@home devices
- A direct download of this software is possible via a link
- Historical ETS applications can also be downloaded (database for ETS App “Reconstruction Tool”)
- www.abb.com/KNX
 - Additional materials
 - Downloads for KNX
 - Software Repository

ABB HOME -> OFFERINGS -> LOW VOLTAGE

Software Repository

Are you looking for a particular piece of software for your structured list of all current and older software versions?

We recommend ensuring that devices are always installed and operating using the latest firmware and software versions. Claims for defects or damages due to the use of software or firmware versions that have not been kept up to date will not be accepted. All information in this repository is supplied without guarantee.

ABB i-bus® KNX Switch Actuators – ETS Application V1.1

Webinar

Light + Building shall take place in March 2022

Onsite + digital: here we go

- At Light+Building the industry presents every two years the latest products for the fields of lighting, electrical engineering and home and building automation
- Light+Building opens in Frankfurt from 13th to 18th March 2022
- The new Light+Building digital additions functions will also be available at the same time and beyond
- We plan our participation in general as a hybrid event, so that customers can join remotely
- You will find ABB and BUSCH-JAEGER booth in the NEW hall 12.0
