## Non-Metallic Systems Adaptaring Type C90

#### **Technical Characteristics**

Conforms to

BSI Kitemark KM-35161 Low voltage directive

| Approvals and Standards            | <b>♡ (E</b>                                  |  |                              |

### Adaptaring Type C90

Adaptaflex

#### **BS EN 61386 Classification**

|  | Fitting | Compression | Impact | Min<br>temp | Max<br>temp | bending | electrical | IP<br>solids | IP<br>water | Corrosion | Tensile | Non-flame<br>Propogating | Suspended<br>load |
|--|---------|-------------|--------|-------------|-------------|---------|------------|--------------|-------------|-----------|---------|--------------------------|-------------------|
|  | AL      | N/A         | 4      | 2           | 4           | N/A     | 0          | 4            | 0           | 0         | 1       | 1                        | 0                 |

#### **Mechanical Properties**

| Test Type               | Methods / Standards | Requirements                               | Value   |
|-------------------------|---------------------|--|---------|
| Tensile Strength        | IEC61386-1          | 2 mins at Specified Value (PAFS21 Conduit) | Class 1 |
| Tensile Strength        |                     | Ultimate Pullout (PAFS21 Conduit)          | 320N    |
| Impact Strength @ -45°C | IEC61386-1          | No visible damage                          | Class 1 |
| Impact Strength @ -5°C  | IEC61386-1          | No visible damage                          | Class 3 |
| Impact Strength @ 23°C  | IEC61386-1          | No visible damage                          | Class 5 |

Tensile Tests to IEC 61386 gives the minimum classification value only. Actual values will depend on the type and size of the fittings used and will always be greater than the minimum – Impact strength is the minimum classification value at the minimum temperature – actual values will depend on size and temperature. Specific values available on request.

#### **Thermal Properties**

| Test Type              | Methods / Standards | Requirements                 | Value           |
|------------------------|---------------------|------------------------------|-----------------|
| Dynamic Applications   | IEC 61386-23        | 5000 Operations at MBR 2hrs  | -45°C to +120°C |
| Static Short Term Temp |                     | Temporary Use (3000hrs)      | -50°C to +120°C |
| Static Long Term Temp  |                     | Permanent Use (30,000) Hours | -40°C to +105°C |
|                        |                     |                              |                 |

## Non-Metallic Systems Adaptaring Type C90

Flammability

| Test Type       | Method / Standard | Requirement                         | Result | Unit      |
|-----------------|-------------------|-------------------------------------|--------|-----------|
| Glow Wire       | BS EN 60695-2-11  | Extinguish within 30s               | 850°C  | °C        |
| Flammability    | IEC 61386-1-12    | 1Kw Burner Flame to Self Extinguish | Pass   | Pass/Fail |
| Oxygen Index    | ISO 4589-2        |                                     | 24.1   | %         |
| Ignition Rating | NF F16-101        | I Rating                            | 14     | -         |

#### Smoke

| Test Type   | Method / Standard | Requirement | Result | Unit |
|-------------|-------------------|-------------|--------|------|
| Fume Rating | NF F16-101        | F Rating    | F2     | -    |
|             |                   |             |        |      |

#### Toxicity

| Test Type    | Method / Standard | Requirement | Result | Unit      |
|--------------|-------------------|-------------|--------|-----------|
| Halogen Free | NFX 70-100        | < 0.5%      | Pass   | Pass/Fail |

#### Pre Test Conditions

| Duration    | Standard | Temperature          | Relative Humidity |
|-------------|----------|----------------------|-------------------|
| 168 (Hours) | IEC61386 | 23 ( <sup>0</sup> C) | 50 (%)            |

The information above is given as a guide only and is based on published technical data and experience. The chemical resistance of the above products is dependant on factors such as chemical exposure, concentration of the chemical and temperature. The above chemicals are valid for a temperature of 23°C. Use of the above table is at the users own discretion and risk. Those using it must satisfy themselves that their application presents no health and safety risks. The end user should assess compatibility with their application and contact Thomas & Betts for further information.

ADHERENCE TO THE CURRENT WIRING REGULATIONS BS7671 OR NEC WIRING REGULATIONS (FOR USA) IS STRONGLY ADVISED. MINIMUM BEND RADIUS FOR FLEXING IS DEPENDANT UPON MINIMUM TEMPERATURE, BENDING FREQUENCY AND CHEMICAL ENVIRONMENT.
