ABB i-bus® KNX   **Software-Information**

Product:	**Room Controller, Basis Device, 8 Modules, SM**
Type:	**RC/A 8.2**
Current application program:	**Room Controller modular 8f2/1.0d**

===

Software Information   to: Room Controller modular8f2/1.0d
                                          from: 01/2021

1.   Changed

Change of the ETS catalog structure. No further changes to the previous version.

===

Software Information   to: Room Controller modular 8f2/1.0c
                                          from: 04/2014

1.   Correction

An error in channel B of a shutter/blind actuator in module slot 5 was removed (move command).

===

Software Information   to: Room Controller modular 8f2/1.0b
                                          from: 04/2014

1.   Correction

Some minor corrections relating to the automatic function of the shutter/blind actuator:
1) On active automatic function the settings "Stop" and "none" were ignored
2) Moving to the end positions were not stored in some cases
3) After ending the safety function in some cases the shutter/blind moved to the automatic position although the automatic mode was previously not active.

ABB i-bus® KNX   **Software-Information**

Software Information   to: Room Controller modular 8f2/1.0a

                              from: 01/2011

1.   Conversion of RC/A 8.1
      into RC/A 8.2

                              The conversion function allows taking over the parameters and group
                              addresses in an ETS project. From this version 1.0a the parameters and
                              group addresses of the Room Controller RC/A 8.1 can be taken over. This
                              may be used e.g. to replace the RC/A 8.1 by an RC/A 8.2 in an existing
                              project.

                              All versions of RC/A 8.1 can be converted. The conversion of RC/A 8.1
                              version 1.6 and higher has been tested. Please note the descriptions of the
                              conversion function in the product manual.
