

Technical Overview

- 2 channels
- 2x300 W (VA) **or** 1x500 W (VA)
- full power up to 45°C !
- automatic recognition of load-type
- superior functionality
 - staircase lighting
 - error reports via EIB
 - presets for lighting scenes
 - capable of being integrated into constant light control

Characteristics

Easy to use

- intelligent functions for user-comfort
- many possibilities for adjustment

Easy to install

- only one device with 4 modules width
- no d-rating up to 45°C

Market Focus

- completion of the ABB-dimmer program for the low-power sector
- main focus on home-market and small commercial applications

Functions I

Control functions

- 4 lighting scenes per channel
- stairwell lighting

Security and monitoring functions

- status objects for ON/OFF and brightness
- error objects: 1bit and 8bit

Functions II

Increasing life of lamps

- maximum / minimum brightness
- soft start

Comfort functions

- return to old brightness after bus-voltage failure (if wanted)
- switch-on brightness adjustable

Functions in Detail

stairwell lighting
