

BUILDING AUTOMATION, 20.04.2020

Release Note

Universal I/O Concentrator

Product name	Univesal I/O Concentrator, 32-fold, MDRC (View Website)
Product type	UK/S 32.1
Order code	GHQ6310026R0111
Current version	Switch Edge Dim Shutter Value Cyclic/1.5 (Download here)
Languages	Germany, English

NOTE:

Always install latest software version provided. Any defects or damages due to an earlier version cannot be claimed.

SOFTWARE INFORMATION

Product Type	Version	Since	Updates and Release Notes
	1.5	04/2020	Application program converted and optimized for ETS 5
	1.4	10/2007	Since September 2007, the product UK/S 32.1 has been replaced by the successive product UK/S 32.2. The new product has remarkably higher software functionality. Both devices have their own application program. Please note: When programming the new product UK/S 32.2 with the application program of the UK/S 32.1, the device will not work. In this case, please import the application program of the UK/S 32.2 into your ETS and insert the device into your project. After reprogramming the UK/S 32.2 with the new application program, the device will then work correctly.
	1.3	08/2003	The number of assignments and group addresses is set to 68 instead of 250. This has been fixed
	1.2	01/2001	If you set the "One-button dimming" function, the following problem exists:

			If you dim the light from 0% to e.g. 50% of the time the lights cannot be switched off by simply pressing a button! It only jumps to 100% brightness and the light goes out only after a second key press (Off)!
	1.1	1999	Response times between short and long button presses are too long! This has been fixed.
	1.0		Application program at time of product launch
