

**ABB i-bus® KNX**

**Universal I/O Concentrator  
UK/S 32.2**

### Overview

- Device for the control of operating panels with push buttons, LEDs or incandescent lamps
- 32 Channels can be individually operated as inputs or output
- 12 or 24 V DC auxiliary voltage necessary
- Up to 80 mA per output

## Software Functions

Most of the software functions are identical to the Universal Interfaces US/U x.2:

- Switch sensor
- Dim sensor
- Shutter sensor
- Send values
- Multi operation and step-switching
- Control LED

Deviations of US/U x.2:

- no pulse counting
- no valve control

Download time during programming via the ETS: 90 seconds
