

Welcome to Board Support Package UN31 V2.31

General

This README file contains important information about the Board Support Package (BSP) UN31. Please read this file carefully and completely. It contains the latest information and relevant documentation.

How to install BSP UN31

- Copy the UN31_autoupdate_231.zip content to an empty USB stick
- Extract the files of the zip file directly onto the USB stick
- plug USB stick in the HMI (Human Machine Interface)
- tool will ask to reboot HMI letting USB stick plugged
- HMI will start and automatic procedure will be displayed on the screen
- when a blank page (without any text inside) is displayed, press the X to close the window
- information about update are displayed. Tool inform to unplug USB stick and reboot the device

Products, BSP UN31 is dedicated for		Version
Product (HMI)	Order code	
CP620	1SAP520100R0001	V2.31
CP620	1SAP520100R4001	V2.31
CP620-WEB	1SAP520200R0001	V2.31
CP630	1SAP530100R0001	V2.31
CP630-WEB	1SAP530200R0001	V2.31
CP635	1SAP535100R0001	V2.31
CP635-WEB	1SAP535200R0001	V2.31
CP635-B	1SAP535100R2001	V2.31
New features		
---		V2.31
Known problems		
BACnet communication driver is not supported		V2.31
